CREATING THE BEST UNIVERSITY TO ATTRACT THE BRIGHTEST STUDENTS
Texas A&M University-Corpus Christi has a robust history of the community’s engagement in our development and expansion. We see evidence of this generous commitment in our facilities, our programs, our faculty and our students. Building upon the well-being of the University opens additional opportunities for many individuals to step forward and provide private support which helps Texas A&M-Corpus Christi fund essential services that cannot be accommodated through state dollars and tuition revenues.

**MEMBER BENEFITS**

Membership in the President’s Council places you among individuals who continually focus their efforts on the vitality of Texas A&M-Corpus Christi. You are both an advisor and a friend to the University. Throughout the year we have many events and activities in which you have the opportunity to meet with fellow President’s Council members. We greatly appreciate the support of this devoted group and ensure ample recognition.

**MEMBERSHIP LEVELS**

- **Platinum Circle** $10,000
- **Silver Circle** $2,500
- **Gold Circle** $5,000
- **Bronze Circle** $1,000

The President’s Council has grown to become our most prestigious private giving society. It is part of the annual giving program, and is rich in tradition. Members of the President’s Council support the Presidential Scholars program, the highest-level scholarship awarded to our best and brightest students. Funds also are used for numerous annual activities and programs implemented through the President’s Office which further build upon community engagement.

As a member of the President’s Council, you become our partner in progress, because your support helps guide us toward the many milestones we will reach.
As state funds for higher education shrink, substantial private giving is becoming more critical than ever in maintaining and building upon the excellence Texas A&M University-Corpus Christi has already achieved.

Getting a top-quality education that will serve them well is the highest priority of today's college-bound students. For donors and legislators, the highest priority is ensuring our ability to serve the educational research and service needs of Texas through visionary strategic operations, and skillful leveraging of their investments.

Texas A&M-Corpus Christi is fortunate to have a loyal base of private donors who clearly understand the power of education to transform the lives of people and the community. Recognizing that the University is an economic engine that helps drive the South Texas economy, many have stepped forward to make substantial commitments that have allowed us to build state-of-the-art facilities, offer significant scholarships and to attract the outstanding faculty who are the foundation of our academic success.

In September 2009, the University launched the $25 million “Momentum Campaign,” a comprehensive fundraising drive that will enable us to establish merit-based scholarships to allow us to compete for the best and brightest students, and to hire and retain brilliant faculty who can truly make a difference in the lives of the next generation. Shortly after the campaign was announced, we surpassed our goal and are now well on our way to achieving the challenge goal of $30 million.

Through the community’s generous investment, the Island University is fast becoming the “jewel of higher education” for South Texas. Today, we stand poised to take our commitment to excellence, engagement and expansion to an even higher level, building on the greatness we have achieved and paving the way for an even brighter future.
New Grant Aimed at Recruiting Teachers

The Sid W. Richardson Foundation awarded a $95,000 grant to launch Texas A&M University-Corpus Christi’s College of Education’s Teacher Recruitment Initiative for high-need areas in mathematics, science, bilingual education or special education.

The Sid Richardson Scholars: Teacher Recruitment Initiative for High Needs Areas Initiative seeks to inform, recruit and support high school and Texas A&M-Corpus Christi and community college students who desire to achieve active engagement in and commitment to one of the professional high-need areas in mathematics, science, bilingual education or special education. The two-year pilot program developed by Dr. Art Hernandez, dean of the College of Education, is being implemented by Dr. Denise Hill and O.B. Garcia.

ELEVEN PALAPAS DEDICATED AROUND CAMPUS

Around 400 people gathered for the Palapas Dedication Ceremony honoring longtime benefactor Dusty Durrill at “Sam’s Place: A Place for Memories,” the main palapa site at Texas A&M University-Corpus Christi. Making a wish and pitching gold coins into the fountain are (from left) City Councilman Mark Scott; contractor James Gourley; Gus Cargile, president of Industrial Fabricators of Corpus Christi; Dusty Durrill; University President Flavius Killebrew; University First Lady Kathy Killebrew; Samantha Hernandez, president of the Student Government Association; Bill Durrill; and sculptor H.W. “Buddy” Tatum. The main palapa fountain site includes a bronze sculpture honoring the memory of Shirley “Sam” Durrill who, along with her husband, was an enthusiastic University supporter. Earlier this year, Durrill was inducted into the University’s Platinum Inner Circle of Excellence Society for his contributions to the University.

LC FOUNDATION BUILDS SCHOLARSHIPS

Lena D. Coleman, founder and CEO of the LC Foundation, presented Texas A&M University-Corpus Christi President Flavius Killebrew with a $100,000 check during a luncheon in August. The gift will help fund student scholarships, faculty enrichment, and activities and programs implemented through the president’s office which build on community engagement. The LC Foundation, Inc. is an affiliate of the Ability One Program, a national non-profit agency that has provided jobs for hundreds of people from all walks of life. The organization is committed to hiring and training people with disabilities and finding them permanent jobs.
ISLANDER ATHLETICS

ATHLETICS DEBUTS NEW BIG ‘I’

Texas A&M University-Corpus Christi student-athletes are sporting a new look during the 2010-2011 season with the debut of uniforms branded with new marks. The unique branding which features a block “I” and the traditional Islander oval is now the primary identity for all 14 sport teams and will be displayed on jerseys, athletic gear and authentic athletic replicas. The look also promotes the name “Islanders” on all uniforms. The brand created by the University’s Office of Marketing and Communications is trademarked through Indianapolis-based Strategic Marketing Affiliates, which represents the licensing interests of more than 165 colleges, universities, conferences, and association properties.

ATHLETICS FORMS “I ASSOCIATION”

The Texas A&M-Corpus Christi Department of Athletics is forming an organization of former student-athletes who have earned varsity letters since the Islanders began play in 1998. The letter winners association, called “I Association,” provides the opportunity for these alum to support the growth and spirit of Islanders Athletics as a group. The Association will hold its first major event at Homecoming on February 3. Nominations are being sought for officers and the call is out for letter winners to join. If you are an Islanders letter winner, please email your contact information, years attended and sport to: letter.winners@tamucc.edu.

MOORE NAMED ITA TEXAS CHAIRMAN

Steve Moore, director of the University’s tennis program, has been named to a three-year term as chairman of the Intercollegiate Tennis Association’s (ITA) Texas Region which comprises of every NCAA Division I school in the state. As chairman of the ITA Texas Region, Moore will be responsible for running the ITA regional tournament, nominating members of the regional committee and having the committee vote on ITA Regional Rankings at the end of the fall and spring seasons. Moore will also serve on the ITA National Tournament Committee that will help determine the at-large and wild-card selections for the ITA National Tournaments.

FITZPATRICK APPOINTED TO NCAA COMMITTEE

Texas A&M University-Corpus Christi Director of Athletics Tim Fitzpatrick will represent the Southland Conference on the NCAA Division I Women’s Basketball Issues Committee. Fitzpatrick, who begins the three-year term, is part of the 16-member committee which ensures that the viability of women’s basketball is maintained, with an emphasis on recruiting activities and development of the public’s perception of the sport.

The committee, which also makes recommendations on policy issues unrelated to legislative and playing rules changes, includes senior administrators and head coaches from eight Football Bowl Subdivision conferences, two Football Championship Series conferences, four Division I at-large members and two student-athletes.

FALL 2010 • THE ISLANDER | 3
Meet Our Outstanding Islander Athletes

MIRNA CICAK
As a 5-year-old growing up in Croatia’s capital of Zagreb, Mirna Cicak watched tennis pro Monica Seles on television and was inspired to play tennis. Today, the junior with an upbeat personality is the top player on the Islander women’s tennis team. As a youngster, Cicak was the second-ranked women’s junior tennis player in her country and competed in tournaments throughout Europe including Italy, Romania, Serbia, Hungary and Germany. She was instantly attracted to the Island University and was excited to train with Islanders tennis coach Steve Moore, who had spent a summer traveling with her idol, Seles. In her first University college match, Cicak beat Rice University’s top player, who was ranked in the top 25 in the nation. As a freshman, Cicak played singles and doubles matches and helped lead the women to their best season in school history and their first appearance in the Southland Conference Tournament.

OMAR GARCIA
When Omar Garcia visited the Island University during his senior year in high school, he sensed a close-knit athletic community. That, coupled with the University’s location on the Texas Gulf coast, sealed the deal for Garcia, a native of El Paso, Texas, who, in 2008, came here on a baseball scholarship. As a redshirt freshman, Garcia hit .321 in 53 at bats, and earned the job as the Islander’s starting catcher. As an Islander, Garcia is excited about playing division I baseball against some of the best teams in the nation. His aspiration is to help the Islanders win a SLC championship and play in the NCAA Regional Tournament. Garcia is a member of the Fellowship of Christian Athletes, the Student Athlete Advisory Committee and the Islander Mentoring Program. His current 3.7 grade point average has earned him spots on the Athletic Director’s Honor Roll and the Southland Conference Commissioner’s Honor Roll.

Bring ‘Em On

Texas A&M University-Corpus Christi men’s basketball fans won’t have to wait long to see how their team stacks up against top-quality competition this season as the Islanders play one of the most grueling non-conference schedules in the team’s history.

On Nov. 15, the Islanders will host the Texas A&M Aggies at the American Bank Center. The meeting will be just the second between the teams and the first since 2004 when the Islanders pulled off an 82-80 upset in College Station. The teams will also play at Texas A&M in 2011 and 2012.

“This game makes a major statement about the direction we are taking the Islander program,” says Texas A&M-Corpus Christi Director of Athletics Tim Fitzpatrick, who has made adding nationally-recognized opponents to the Islanders’ non-conference home schedule a top priority. “We are committed to bringing high-quality opponents to Corpus Christi and providing our fans with an exciting brand of college basketball that will pack the stands.”

Beating Texas A&M a second time could be a formidable task as the Aggies return 12 players from last year’s squad that posted a 24-10 record and placed a strong fourth in the powerful Big 12 Conference. Texas A&M, which finished the season ranked in the top 25 of most national polls, advanced to the second round of the NCAA Tournament where they fell to the Purdue Boilermakers 63-61 in overtime.

The non-conference road looks just as challenging for the Islanders who will travel to Stillwater, Okla., on Nov. 17, to take on the Oklahoma State Cowboys then, six days later, take on the Kansas Jayhawks, one of the most successful teams in NCAA history. On Dec. 18, the Islanders will face another home court test when they host the resurgent University of Houston Cougars. Last year, Houston upset Texas-El Paso in the Conference USA Tournament championship game to advance to the NCAA Tournament for the first time in almost 20 years. The Islanders end their swing through the Big 12 when they take on Texas Tech in Lubbock on Jan. 2, 2011.

Texas A&M-Corpus Christi opens Southland Conference play on Jan. 8, at McNeese State before returning home to play UTSA. Last year, the Islanders posted a 17-15 record and, for the second straight season, advanced to the semifinals of the Southland Conference Tournament. As the Islanders enter Perry Clark’s fourth season at the helm, they return four players who started 25-or-more of the team’s 32 contests. Leading the returnees will be the inside tandem of seniors Demond Watt, a third-team All-Southland Conference selection a season ago, and Justin Reynolds, whose 911 career points is tops amongst current players. Also returning are Horace Bond, a senior who started 31 games a season ago, and Terence Jones who started 25 games as a freshman.

Early Schedule Includes Showdown with Texas A&M Aggies

Also returning are Horace Bond, a senior who started 31 games a season ago, and Terence Jones who started 25 games as a freshman.
Run for the Money

After winning a school record 24 games last season, the Islander women’s basketball team will face a 2010-2011 non-conference schedule that includes seven teams that made it to postseason play a year ago as they prepare for a run at the Southland Conference championship.

The Islanders ended last season with a loss to Memphis in the semifinals of the Women’s Basketball Invitational. This year, Head Coach Robert Robinson has the nucleus for another strong team in seniors Jade Davis, Lauren Smith, Adrienne Scott, Louvina Robinson, Anita Jeffery and Myeisha Myles who all logged significant playing time last year.

The Islanders Tip-Off Tournament at the American Bank Center on Nov. 12, and Nov. 13, will feature the Iowa Hawkeyes, a team that finished fourth in the Big 10 and posted a 21-14 record in advancing to the second round of the NCAA Tournament. Rounding out the field are the Southern Jaguars, who won the Southwestern Athletic Conference Tournament championship before losing to top-ranked Connecticut in postseason, and the Arkansas State Red Wolves.

Following the season-opening tournament, the Islanders will take a five-game road trip that begins on Nov. 17, with a stop at historic “Phog” Allen Field House to take on the Kansas Jayhawks who narrowly lost to South Florida in last season’s Women’s NIT (National Invitation Tournament) championship game.

ISLANDER WOMEN SET SIGHTS ON SLC CHAMPIONSHIP

“These early tests are a way to get us ready for Southland Conference play,” says Robert Robinson. “Playing good quality teams and having to compete at a high level against those teams will make us better and, with the upperclassmen we have returning, we should be up to the challenge.”

The Islanders’ non-conference schedule also includes three major tournaments including the Coors Rocky Mountain Invitational on Thanksgiving weekend, and the Gator Holiday Classic where the field includes Florida and Robert Morris, teams that made it to the Women’s NIT last year. The final preseason tournament comes just before the New Year when the Islanders play North Dakota and Utah Valley on Dec. 28-29 in Missoula, Mont., at the Lady Griz Holiday Classic.

The Islanders, who finished second in the Southland Conference West last year, open league play on Jan. 8, when they take on McNeese State at the American Bank Center.

They will also play four games on campus at the Dugan Wellness Center, including Southland contests against UT-Arlington (Jan. 19), Texas State (Jan. 26) and Lamar (Feb. 19).

“We really enjoy playing in the Dugan Wellness Center,” says Robinson. “Our fan support is amazing and the environment was really outstanding last season. I’m looking forward to playing more games on campus this year.”

DANIELA ‘DANI’ PRADO

Islander cross country student-athlete Daniela “Dani” Prado has her heart set on a career as a cardiac rehab specialist in a human performance lab. The Laredo, Texas, native joined the women’s cross country team in fall 2007 and is in the right place to fulfill her career aspirations. Prado is earning her bachelor’s degree in exercise science and plans to pursue a Master of Science in Kinesiology at the Island University. During her first season, the Women’s Cross Country team placed first at the Southland Conference Championships. Despite a femoral neck stress fracture which required surgery in April 2008, Prado is in training to make a full force comeback on the track. Last fall, she returned to her sport, but during the 2010 fall season she emphasized distance running. Her stellar stats date back to Nixon High School when she was the 3,200 meter champion in 2005 for Region 4.

RYANN WHITE

When she was 15, Ryann White’s grandfather introduced her to golf and before long she was playing for the team at Coronado High School in Lubbock, Texas. She heard about the Islander women’s golf program through a high school coach and during a visit to the Island University during her senior year in high school, White was instantly attracted to the golf program and the warm campus atmosphere. She joined the University’s golf team and, in May, 2009, during her sophomore season, the Islanders won their first SLC golf championship and advanced to the NCAA West Regional in Tempe, Ariz., where she shot a 77 in the second round and came in at 242 over the three-round tournament. White, now a junior, is majoring in sports management with a minor in marketing. She is on the Dean’s List and maintains a 3.9 grade point average while taking a full course load.
NEW BUILDING RECEIVES TOP BEAM
University President Flavius Killebrew (left), Kathy Killebrew (center), Karen O’Connor Urban (right) and other Islanders put their signatures on the beam that was hoisted atop the new Michael and Karen O'Connor building that will be home to the University’s College of Business during a “Topping Out” ceremony July 8. The $25 million, 75,000-square foot facility made possible in large part to a $6 million gift from the late Corpus Christi businessman Michael A. O’Connor and his wife, Karen O’Connor Urban, will house a Center for Economic Research, offices, classrooms and two computer labs.

HISPANIC ENROLLMENT EXCEEDS STATE AVERAGE
As a Hispanic Serving Institution, the University’s Title V and Trio “Opening the Pipeline/Closing the Gaps” program is nationally-recognized for creating a more welcoming ambiance for Hispanics on campus, especially those from underserved and first generation families. Due largely to the University’s commitment to closing the gaps in student participation, student success, excellence and research our Hispanic enrollment of 38 percent far exceeds the state average of 24 percent. This year Texas A&M-Corpus Christi was rated 29th in Hispanic Outlook magazine’s annual listing of Top 100 Universities awarding doctorates to Hispanics. Recently, the University was selected as an “Institution Dedicated to Diversity” by Minority Access, a non-profit organization that supports the diversification of campuses by improving the recruitment, retention and enhancement of minorities.

UNIVERSITY RECEIVES ACCOLADES IN TOP HISPANIC EDUCATION PUBLICATION
Texas A&M University-Corpus Christi is ranked 29th in the nation in awarding doctorate degrees to Hispanics by Hispanic Outlook, the only magazine for the higher learning community that focuses on Hispanic education.

Texas A&M-Corpus Christi was third among Texas schools in the magazine’s annual listing of Top 100 Universities for Hispanics, ranking behind the University of Houston (12) and the University of Texas-Pan American (19). Nova Southeastern University topped the list followed by the University of Southern California, University of California-Berkeley and UCLA. The list was compiled with information provided by the U.S. Department of Education’s National Center for Education Statistics.

As a Hispanic Serving Institution, Texas A&M-Corpus Christi is dedicated to excellence in teaching, research, creative activity and service through programs that support underserved and/or low-income, first-generation Hispanics and other minority students in South Texas. The University is also dedicated to closing the historical educational gap within the strategic location on the Gulf of Mexico and on the cultural border with Latin America.

Art Museum Touts Prestigious Accreditation
The Art Museum of South Texas has achieved accreditation from the American Association of Museums (AAM), the highest national recognition for a museum. Accreditation signifies excellence to the museum community, to governments, funders, outside agencies, and to the museum-going public. Of the nation’s estimated 17,500 museums, 775 are currently accredited. The Art Museum of South Texas (AMST) is one of only 39 accredited museums in Texas. Located in downtown Corpus Christi, the Art Museum of South Texas is a world-class facility affiliated with Texas A&M-Corpus Christi showcasing a colorful variety art collected from throughout the South Texas region.
OFFICE OF COMMUNITY OUTREACH RECEIVES TCEQ ENVIRONMENTAL EXCELLENCE AWARD

Texas A&M-Corpus Christi was third among Texas schools in the The Texas Commission on Environmental Quality (TCEQ) has honored the University’s Office of Community Outreach with a 2010 Environmental Excellence Award. The awards were presented in eight categories with, Community Outreach winning in the Civic/Nonprofit Organization category for its diversity of programs including:

• The kayak-based environmental education program that includes exploration of the Padre Island National Seashore, fishing with Texas Parks & Wildlife’s Kidfish Program, trips aboard the University of Texas Marine Research Vessel “Katy”, the Texas State Aquarium, and a surf day for the Advanced Campers.
• The Pollution Prevention Partnership’s Autocheck program that identifies vehicles that are discharging harmful pollutants into the air and schedules the vehicle for repairs at a participating garage, typically with no cost to the owner.
• The storm water outreach program for small businesses and municipalities to increase awareness of storm water issues protect and improve the water quality of Coastal Bend streams, bays, estuaries and the Gulf by reducing storm water pollution.
• The design and installation of oil and oily water bilge water pump out systems in area harbors that provide boat operators with an easy and non-polluting way to discharge their waste oil and oily bilge water. This reduces discharges to area waters and the impact of that pollution.

This marks the second time that the Office of Community Outreach has won the award, which honors individuals, organizations and businesses that protect the state’s human and natural resources while ensuring clean air and water and the safe management of waste. In addition to winning in 2000, Community Outreach was a finalist for the award in 1999 and 2009.
Texas Gov. Rick Perry has appointed Eric Rohne, finance major in the College of Business, to serve as the student representative to the Texas Higher Education Coordinating Board. At the Island University, Rohne serves on the Committee on Strategic Planning and Policy, the Committee on Closing the Gaps, and the Committee on Agency Operations with the State of Texas. He is a past president of the University’s Beta Theta Pi chapter, a former President’s Ambassador and a member of the Campus Activities Board, Student Accounting Society and the Student Finance Association.

Larry J. Urban, the 2010 G. Russell Kirkland Distinguished Visitor, meets with students at the reception following his presentation.

**ERIK ROHNE**

Texas Gov. Rick Perry has appointed Eric Rohne, finance major in the College of Business, to serve as the student representative to the Texas Higher Education Coordinating Board. At the Island University, Rohne serves on the Committee on Strategic Planning and Policy, the Committee on Closing the Gaps, and the Committee on Agency Operations with the State of Texas. He is a past president of the University’s Beta Theta Pi chapter, a former President’s Ambassador and a member of the Campus Activities Board, Student Accounting Society and the Student Finance Association.

Larry J. Urban, the 2010 G. Russell Kirkland Distinguished Visitor, meets with students at the reception following his presentation.

**COLLEGE OF BUSINESS HONORS URBAN WITH KIRKLAND AWARD**

Larry J. Urban, chief project engineer and co-founder of Urban Engineering, is the recipient of the 2010 G. Russell Kirkland Distinguished Visitor in Business Administration Award presented by the College of Business at Texas A&M University-Corpus Christi.

“Mr. Urban is a successful, self-made businessman who is devoted to the community and possesses many outstanding personal qualities that make him a model for aspiring students,” says Dr. Moustafa Abdelsamad, dean of the University’s College of Business. “He has been involved in many programs to enhance the quality of life for the youth and citizens of Coastal Bend. He is very supportive of the University and the College of Business and is a special friend that we can call on when the need arises.”

After earning his Bachelor of Science in Engineering from Texas A&M University in 1959, Urban joined the U.S. Army. Following completion of the U.S. Corps of Engineers Officers Basic Course, Lt. Urban was posted in Korea. When he returned to the United States, he served at Fort Hood, Texas, as commanding officer, Headquarters Company and, subsequently, assistant battalion operations officer until discharged in 1962.

Urban was licensed to practice engineering in January 1965, and soon after, he and his brother Eugene founded Corpus Christi-based Urban Engineering. Of special interest to Urban has been the planning, design and construction supervision of planned community developments, especially recreation oriented developments containing golf courses, marinas, tennis facilities, etc.

Urban is a member of the Texas Society of Professional Engineers and the National Society of Professional Engineers. He holds licenses as a registered professional engineer and registered professional surveyor in the State of Texas.

His engagement in the community includes serving as director, Youth City; director, American National Bank; curriculum advisor, Del Mar College; curriculum advisor, Texas A&M University; member of the Business Advisory Council of the College of Business at Texas A&M University-Corpus Christi; director, Mustangs; chairman of the board, Ada Wilson Children’s Rehabilitation Hospital; and board member, Texas State Aquarium.

The G. Russell Kirkland Distinguished Visitor in Business Administration Award was created to honor Kirkland’s distinguished service to the University, Corpus Christi, and South Texas. Recipients are chosen for their personal accomplishments and contributions to the success of students, faculty, the University and the Corpus Christi community. Kirkland was the University’s vice president for development from 1975 through 1978. Prior to joining the University, he was associated with Merrill Lynch, Pierce, Fenner and Smith, Inc. for 35 years.
Stars Shine on PAC Stage
FROM COWBOY TO CLASSICAL, PERFORMING ARTS CENTER BRINGS BEST TO COASTAL BEND

In the five years since the University’s Performing Arts Center celebrated its opening with a sold-out performance by Tejano legend Freddy Fender, the “PAC” has established itself as the premier cultural arts and entertainment venue for both Texas A&M University-Corpus Christi and the Coastal Bend community.

The world-class acoustically-superb PAC features a 1,500-seat concert hall with state-of-the-art acoustics, and a striking 50-foot glass-walled lobby with a beautiful view of Corpus Christi Bay and the downtown skyline. Entering its sixth season, the PAC has already hosted performances by many world-renowned artists including violinists Itzhak Perlman and Joshua Bell, mezzo soprano Frederica Von Stade, and Van Cliburn, winner of the first International Tchaikovsky Competition in 1958 and a 2003 recipient of the Presidential Medal of Freedom.

The PAC also shines the spotlight on the University’s many artistic performances and productions, serving as the stage for musical recitals by faculty and student groups as well as the hugely-popular “Islander Revue,“ the yearly musical variety show showcasing student groups and organizations. Through an annual grant administered by the College of Liberal Arts Community Arts Advisory Council, the PAC is also available to non-profit performing groups and is now the principal performing venue for the Corpus Christi Symphony Orchestra, Corpus Christi Liv! and the Corpus Christi Chorale.

Perhaps the most anticipated PAC event each year is the return of “Michael Martin Murphey’s Cowboy Christmas” which plays to a sold-out house every holiday season. The annual concert, part of the Robert and Gloria Furgason Bravo! Series for the Performing Arts, will kick off the sixth season of the Bravo! Series on Tuesday, Dec. 7. The 2010-2011 season also includes concerts by the world famous Glenn Miller Orchestra and Steinway artist Jeffrey Swann.

The Furgason Bravo! Series is named in honor of the retired University president and his wife who chaired the fund-raising drive that made the $18 million facility a reality. Among the community leaders to step forward were former Corpus Christi-Caller Times publisher Ed Harte and his wife, Janet, who provided $3.5 million, and Samuel Fresch, a financial consultant and supporter of the arts who contributed $1 million to the campaign.

A simple gift... A lasting memory.

When you dedicate a chair in the Performing Arts Center to an individual or organization, you have the opportunity to warm the heart of the music lover before the performance ever begins.

For a donation of $250, a plaque (actual size 1.5” x3”) honoring your choice of organization or individual name will be permanently affixed to the armrest of each seat that you dedicate.*

Please contact Dr. Lari Young, Director of the PAC, at lari.young@tamucc.edu or the Development Office at (361) 825-2420 to secure a chair at the Performing Arts Center.

*This is not the purchase of a seat option or license, and does not guarantee that particular seat will be available to you for any concert or event.

Support the Momentum Campaign. • giving.tamucc.edu

In Memory of Irene M. Hajek

The first plaque dedicated in memory of Irene Hajek was made by friends of the University, Terry and Andrea Hajek and Linda and Gordon Landreth.
UNIVERSITY RANKED AMONG TOP SCHOOLS FOR RECRUITING AND RETAINING VETERAN STUDENTS

For the second year in a row, Texas A&M University-Corpus has been designated as a “Military Friendly School” by G.I. Jobs magazine. Colleges, universities and tradeschools named as “Military Friendly” must rank in the top 15 percent nationwide for efforts and results in recruiting and retaining military and veteran students to increase diversity among the student body, faculty and staff.

To assist veterans and their dependents attending the Island University, Texas A&M-Corpus Christi has adopted the Military Student Bill of Rights and is participating in the Service-members Opportunity Colleges, a consortium dedicated to helping servicemembers and their families obtain college degrees. In 2008-2009, the United Student Veterans Organization (USVO), which helps veterans in the transition from military to academic life, was named the Texas A&M University-Corpus Christi Organization of the Year.

In addition, the University’s Department of Veterans Affairs assists new and returning generation of veterans with applying for educational benefits granted by the Post 9/11 GI Bill, the largest investment in veterans’ education since World War II, which covers the full cost of an undergraduate education at any public university or college and many private schools.

For more information about the Post 9/11 Veterans Education Assistance Act of 2008 and assistance with applying for benefits, call the Veterans Affairs Office at 361.825.2331; or go to http://vets.tamucc.edu/

‘Islander Appreciation’ Day Serves Veterans Who Served Their Country

Veterans from all branches of the United States military received free information on educational benefits and other state and federal programs available to those who have served their country at the “Islander Veterans Appreciation Day” in August. During the free event open to all area veterans, representatives from the University’s Financial Aid, Admissions and Veterans Affairs offices answered questions for prospective and current students and provided information on the “Post 9/11 Veterans Education Assistance Act of 2008” and many other important benefits including the “Texas Hazlewood Legacy Program” which allows veterans to transfer some of their educational benefits to their children. In addition, a representative from the TVLB provided information on low-term housing, land and home improvement loans. Military recruiters were also on hand with information about opportunities in all five branches of the U.S. armed forces.

CORONADO NAMED COORDINATOR OF VETERANS AFFAIRS OFFICE

Capt. Rene Coronado, a Corpus Christi native, has been named coordinator of the University’s Office of Veterans Affairs. In his position, Coronado oversees the day-to-day operations of the Office, which currently serves more than 500 veterans and dependents of veterans attending Texas A&M University-Corpus Christi.

Coronado joined the Texas Army National Guard in 1991 and, after graduating from Texas A&M-Corpus Christi in 1997, was commissioned into the U.S. Army as a second lieutenant. He served on active duty until December 2007 when he enrolled at the University of Texas at Brownsville. He will graduate in fall 2010 with a master’s degree in interdisciplinary studies with a concentration in sociology.

DIAZ ELECTED STATE VET REP

Anthony Diaz, president of the United Student Veterans Organization (USVO) at Texas A&M University-Corpus Christi, has been elected 2010 director of the Texas chapter of the Student Veterans of America (SVA), a coalition of student veterans groups from college campuses across the United States. As state director, Diaz, a former U.S. Marine, will meet with elected state leaders to discuss veterans’ issues and proposed legislation that will help students make the transition from military to college life. Founded in January 2008, the SVA develops new student groups, coordinates between existing student groups, and advocates on behalf of student veterans at the local, state, and national level.
The Estill Foundation recently endowed the scholarship fund honoring Jeannette Holloway, a graduate and longtime benefactor of Texas A&M University-Corpus Christi. This generous gift will allow more than 20 students a year the opportunity to realize their dreams of a college degree.

Creating a scholarship endowment is one way to ensure your contribution will remain in perpetuity to support higher education and to help the University remain competitive in attracting the brightest students.

In recognition of donors making significant contributions to endowed scholarships, the University established the Endowed Scholarship Council. Donors with cumulative gifts to endowed scholarship funds of $50,000 or more are inducted into the Texas A&M University-Corpus Christi Endowed Scholarship Council and recognized at the annual Endowed Scholarship Banquet. To learn more about ways you can help the students through Texas A&M-Corpus Christi Foundation, please call 361.825.2420.
CREATING THE BEST UNIVERSITY TO ATTRACT THE BRIGHTEST STUDENTS
At a time when the practice of sound economic principles is essential to the financial stability of the United States and the rest of the world, it is more critical than ever for investors to carefully manage their resources to ensure the best possible return on investments. In higher education, that means creating a win-win situation for students and those in both public and private sectors who support and depend on the viability of their institutions and universities and the quality of graduates.

The bottom line for students, parents, donors and legislators is the return on their investment. Students deserve the best possible faculty, facilities and curricula, and donors and legislators expect universities to maximize their investment by providing students with a high-quality education while, at the same time, preparing for a challenging future through strategic planning and implementation.

Although a campus located on its own lush subtropical island makes Texas A&M University-Corpus Christi unique among American universities, its academic excellence, its faculty and programs, and the University's exceptional facilities are attracting some of the best and brightest young people from throughout Texas and, increasingly, across the nation. And with a 20-to-1 student-to-faculty ratio, our students experience close teaching relationships from superior faculty who explore the cutting edge.

Texas A&M-Corpus Christi's success-oriented professors, challenging degree programs, groundbreaking research programs and diverse student population make the Island University a logical choice for high school graduates and graduate students looking to further their education. The implementation of the University's mechanical engineering program along with the cooperative Ph.D. in Nursing and the Ph.D. in Marine Biology are enhancing the University's Academic credentials, and with professors, students and graduates from our colleges of Business, Education, Liberal Arts, Nursing and Health Sciences, and Science and Technology earning local, state, national and even international recognition, the excitement of excellence continues to build at the Island University.

“The University has an ambitious agenda and through the hard work of many dedicated people, these goals are being met,” says Dr. Flavius Killebrew, president and CEO of Texas A&M-Corpus Christi. “While we don't sell shares, we do consider all who have generously supported our growth and believe in our future to be our stakeholders. That is especially true of our students whose top priority is to receive a top-quality education that will serve them well throughout their careers.”

IMPACTING ECONOMIC GROWTH
With more than 1,400 undergraduate and more than 200 graduate students pursuing degrees, the University's College of Business is providing a strong foundation in the principles of accounting, marketing and business administration. Programs are designed to help students further their careers, and pursue advanced studies within a changing global environment. Undergraduate programs offer selected specializations built on a foundation of general education and a broad business core. The college promotes a high code of ethics, special concern for student learning, and the effective use of technology.

Within the community, the College of Business offers resources to foster economic growth. In 2009, the college launched The Coastal Bend Business Innovation Center which, through its Business Incubator program, helps accelerate the growth of emerging innovative companies for the purpose of creating jobs, promoting entrepreneurial economic development endeavors and providing executive level education to the greater South Texas Coastal Bend area.

“This is an exciting time to be a business entrepreneur, with the free enterprise way of doing business thriving, the demand for business graduates will continue to increase,” says Dr. Mustafa Abdelsalam, dean of the College of Business. “Change is accelerated and survival and growth are assured only to those who are agile, innovative, and constantly learning new skills and unlearning obsolete ones. Global advances in technology are changing the business environment and providing great opportunities in all areas of the economy.”

PREPARING QUALITY EDUCATORS
The demand for a well-educated workforce to compete in a global economy is creating a need for more highly qualified teachers. The College of Education is helping meet that demand through a program that enables students to earn an accredited degree while taking the necessary state teacher training courses concurrently.

“Preparing effective novice teachers involves more than equipping them with a core set of competencies and skills,” says College of Education Dean Art Hernandez. “We prepare educators to think critically, analyze effectively, and usedata to make decisions impacting their students' success. Our investment for the future is to prepare graduates to meet the particular educational needs of their students and the evolving expectations of our community, state and nation.”

OUTSTANDING ISLANDER
LAUREN LOVELESS
As a high school senior, Lauren Loveless received numerous scholarships but was drawn to the Island University by the quality of its marketing and management programs. It only took Loveless two and a half years to graduate summa cum laude with a bachelor's degree in marketing in December 2009. While still a senior, she began taking post-graduate classes and is currently enrolled in the University’s MBA program. Loveless, who is a member of the Honor Student Association, has maintained an A+ grade point average and has earned several scholarships. After earning her master's degree, she plans to become a marketing manager.

OUTSTANDING ISLANDER
JUSTIN MILNER
Justin Milner, a native of Bedford, Texas, is majoring in kinesiology with a minor in social studies. After graduating, Milner plans to become a teacher and coach, but when he's painted up for his role as leader of the University’s Blue Crew, it’s a full-time job of “Mischief, Mayhem and Madness.” The enthusiastic student organization is one of the fastest-growing campus groups with members who attend and promote Islander Athletic games—from basketball and baseball to volleyball and softball. Milner also serves on the executive board for Beta Theta Pi and is vice president of recruitment for the Interfraternity Council.
Since the April 20, 2010, explosion of the Deepwater Horizon oil platform off the Louisiana shore, scientists with the University’s Harte Research Institute for Gulf of Mexico Studies (HRI) have made numerous trips to the coast and are continuing to provide vital knowledge and information about the consequences and long-term effects of the largest peacetime oil spill in history. In June, the HRI sponsored four panels to update the public and discuss the long-term impact of the catastrophe.

Within the next year, the HRI, which in just 10 years has already established itself as a world leader in the protection and conservation of the world’s ninth-largest body of water, will host the second “State of the Gulf of Mexico Summit” to bring international experts together to assess the long-term damage from the Deepwater Horizon oil catastrophe. The summit will focus on the ecological and economic issues that will plague the affected waters and ecosystems for many years and build on the relationships created by the first “State of the Gulf of Mexico Summit” in 2006, following the devastation of Hurricane Katrina.

Since 1995, the College of Education has awarded 3,130 bachelor’s degrees, 3,158 graduate and 193 doctoral degrees. These degrees, certifications and specializations prepare students for a wide variety of careers in professional education. Each year more than 130 independent school districts from across Texas attend the University’s Teacher Job Fair to recruit graduates. Undergraduate students spend a significant portion of their professional development courses working alongside experienced teachers, moving with observation and cooperative teaching to taking full responsibility for a class. Graduate students prepare to become educators and leaders in their fields, working closely with faculty and enjoying opportunities for field experience and collaborative research.

DEVELOPING SCHOLARLY OPPORTUNITIES

The College of Liberal Arts serves the largest number of Texas A&M-Corpus Christi students, accounting for 75 percent of the core curriculum instruction and offering 15 undergraduate majors, six graduate degrees and six minors. The College also provides learning experiences outside the classroom, with students and faculty working with more than 180 community organizations, both as interns and participants in service learning projects that benefit the student and the community.

“Our faculty members are more than outstanding teachers, they are scholars who are engaged in creative and scholarly activity,” stresses Dr. Kelly Quintanilla, dean of the College of Liberal Arts. “Their work as scholars creates opportunities for students to participate in academic competitions, music and theatre performances, art exhibits, film-making and research projects across disciplines.”

In addition to offering a full range of traditional liberal arts degrees, the college is implementing new programs to meet the changing needs of society. This year, the Master’s in Public Administration program began offering a 15-credit graduate certificate in Homeland Security designed to meet the complex, contemporary needs of homeland security specialists, law enforcement professionals and other security professionals.

ENSURING A HEALTHY COMMUNITY

Today, the United States faces an ever-increasing lack of nursing professionals. While some of the problem can be attributed to the aging baby-boomer generation, the national shortage of nurses is intricately linked to a lack of state-of-the-art training facilities at universities across the nation. This fall, Texas A&M University-Corpus Christi took a major step toward addressing those needs with the opening of Island Hall, the $45 million, 148,000-square-foot building that is home to the College of Nursing and Health Sciences and the College of Education’s kinesiology program.

“We have the shortage of trained professionals in the workplace, there could not be a better time to become a nurse,” points out Dr. Mary Jane Hamilton, dean of the College of Nursing and Health Sciences. “Despite steep job losses in many other sectors of the economy, hospitals, long-term care facilities and other ambulatory care providers are aggressively seeking highly skilled nurses to fill the thousands of new jobs being added in the healthcare industry.”

With almost 1,000 students and a graduation rate of 93 percent, the college is supplying hospitals throughout the country with top-notch nurses equipped with the skills essential to meet the demands of the healthcare industry.

OUTSTANDING ISLANDER

ARTURO CORONA

When there’s family distress, education specialist Arturo Corona strives to come up with an optimal solution for everyone. A 2003 graduate of Premont High School, Corona received his bachelor’s degree in criminal justice in 2007 and is currently maintaining a 3.9 grade point average while working on his master’s degree in counseling with an emphasis in family and marriage therapy. Corona counsels impoverished families at the Antonio E. Garcia Arts & Education Center and works at the Early Childhood Development Center Counseling and Training Clinic. He plans to pursue his dream of going to law school to study family law.

Istanbul Travel Abroad Program

During summer 2010, students in the University’s “Core Curriculum Abroad” program traveled to Instanbul, Turkey, for an international learning adventure that included interdisciplinary courses and visits to the city’s markets, palaces, civic centers, parks, museums, mosques and teagardens to provide exciting, open-air classrooms for classes taught by faculty members Don Luna, public speaking; Joseph Joziwak, political science; Pamela Meyer, sociology; Tania Anders, geology; and Mary Beth Davis, literature. Students received six hours credit for each course taken.

The group also took a 10-day tour through Turkey, visiting prehistoric sites including the ancient centers of Troy and Hierapolis, and the excavated cities of Ephesus and Aphrodisias. More than half of the 25 participating students were first-year college students with no previous international travel experience.

When Nicole Aston moved to the Island University campus housing in fall 2006 she found a lasting friend in her roommate, a Chinese international student, who shared customs and sparked Aston’s desire to experience China. Last year, the senior biomedical sciences major spent a semester in Beijing studying the Mandarin language, Beijing history, and participating in a medical/health internship as the University’s first medical/health intern. Aston has also worked as a tutor for the 21st Century After School Program at Hamlin Middle School and worked in the department of Life Sciences media prep lab.

Laura Villalobos has always had a tremendous respect for nurses. During her summers as a high school student, she volunteered at Christus Spohn Hospital Corpus Christi–Shoreline shadowing nurses in the emergency room and the pharmacy. Now, a senior with a 3.65 grade point average, she entered the nursing program in fall 2009. She is on the Dean’s List, is a member of the Honors Student Association, has served as a representative for the College, and is part of the University’s Honors Program to enrich plans of study to highly motivated students who have the ability to excel academically and the desire to develop global perspectives.

The College of Science and Technology offers undergraduate and graduate degrees in basic and applied sciences essential to a vibrant modern society. The college also provides specialized courses and degree sequences for students seeking science and mathematics teaching certifications. Two new marine Ph.D. programs, Coastal and Marine Science and Marine Biology, have generated exciting new programs of faculty and student research. A new BS in Mechanical Engineering is taking the college into yet another key area of education and research critical to the community.

“There has never been a more critical time for scientific training and research in our nation’s history,” says Dr. Frank Pezold, Dean of the College of Science and Technology. “The shortage of scientists and engineers forces us to look abroad to meet our needs whether in the classroom or industry, and that need is growing. The faculty and I are here to engage the children of our community in basic and applied scientific training, inform the public of significant discovery and understanding, and meet the challenges of research in new frontiers.”

The college is home to the National Spill Control School, the Center for Coastal Studies, the Conrad Blucher Institute for Surveying and Science, the Center for Water Supply Studies, and is supported by affiliated faculty in the Harte Research Institute (HRI) for Gulf of Mexico Studies.

Laura Villalobos

Nicole Aston

The success of Texas A&M-Corpus Christi has been made possible by the commitment and perseverance of elected representatives who share our vision, and the generosity of private donors who understand clearly the challenges ahead. It is through their unwavering support that innovative degree programs have been established; much-needed buildings constructed; and land for expansion acquired.

“Texas A&M-Corpus Christi’s investment in growth and dedication to high-quality education has brought us to the threshold of an even more inspiring future,” says Dr. Frank Pezold, Dean of the College of Science and Technology. “The shortage of scientists and engineers forces us to look abroad to meet our needs whether in the classroom or industry, and that need is growing. The faculty and I are here to engage the children of our community in basic and applied scientific training, inform the public of significant discovery and understanding, and meet the challenges of research in new frontiers.”
Oil in a Day’s Work

While the causes of the Deepwater Horizon explosion are still being debated months after the oil rig burned and sank on April 20, 2010, causing about 206 million gallons of oil to gush into the waters 40 miles off the Louisiana coast, one fact is clear to the vast majority of experts charged with protecting the health of the Gulf of Mexico.

“The technology for deep-water oil drilling has outpaced the industry’s ability to respond to catastrophic events and to accurately assess the natural resource damages,” says Tony Wood, director of the National Spill Control School (NSCS) at Texas A&M University-Corpus Christi. “That may be the most critical lesson learned from the BP disaster. It’s important to be able to prevent future occurrences like this, but when they do happen, we need to be able to respond with adequate technologies and enough qualified responders to limit the effects on the environment.”

The industry and government response to the oil spill was well underway when Wood became the NSCS director at the end of May 2010. The need for an army of trained workers and volunteers was already evident and David Jensen, the retired former director of the NSCS, had already left for Alabama to help with the crisis. Wood, who has more than 30 years experience in the environmental industry related to hazardous waste, environmental sustainability, and environmental business development since graduating from Corpus Christi State University in 1979 with a degree in Marine Biology, increased the school’s course offerings and trained a group of qualified response workers with the one-week “Oil Spill Response and Inland Waterways” course taught by the NSCS. The class consisting of University students, members of the U.S. Coast Guard and state agency and industry workers, received critical 40-hour HAZWOPER training, FIS/GPS, Incident Command training, and ShorelineCleanupAssessmentTeam training required to work with hazardous materials such as are encountered in oil spill situations.

The Occupational Safety and Health Administration requires anyone working with oil spills to receive 40 hours of classroom instruction and the Coast Guard, port authorities and private companies are looking for places for their workers to be trained. To meet this increased demand, Wood doubled the number of class offerings for the fall 2010 semester.

“Advances in drilling technologies permit drilling in deepwater or otherwise remote sites, and increasingly larger vessels carry potentially far more damaging cargos than in the past,” points out Wood. “However, institutions that train for such occurrences have been left with limited resources for updating their training programs. It is critical that any new legislation related to improved prevention and control of spills reverse this waning attention and include additional resources for planning and training.”

The University’s National Spill Control School was established in 1974 as a joint project with the Corpus Christi Area Oil Spill Control Association to provide training in the safe and effective handling of oil and hazardous material spills. The first oil spill classes were taught in 1977 and, in 1980, Hazmat/waste classes were initiated. In addition to teaching courses throughout the United States, NSCS has taught classes in Korea, Nigeria, Mexico, Canada, Ecuador, and Venezuela.

The Oil Pollution Act of 1990 named the NSCS as “a training and research resource” for the National Response Team. In 1998, the NSCS was recognized by the Texas General Land Office for its “leadership in protecting the environmental quality of Texas coastal waters.”

Today, the NSCS offers a wide range of courses in oil spill planning, management, assessment, response and safety. Oiled Wildlife Rehabilitation, Hazardous Waste Operations and Emergency Response (HAZWOPER), Hazardous Materials Transportation, Introduction to Geographic Information Systems, and Spill Information Management Systems are some of the more specialized courses. Additional services in contingency planning and field exercises development are also offered.
Island Hall Opens Doors to Students

NEW FACILITY MEETS THE NEEDS OF NURSING SHORTAGE

Island Hall, the $45 million, 140,000-square-foot building that opened at the beginning of the fall 2010 semester, is home to the University’s College of Nursing and Health Sciences and the College of Education’s kinesiology program. The nursing facilities include offices, various-sized classrooms, computer labs, a simulated hospital ward, patient simulator laboratories, and other specialized research spaces. The kinesiology area includes classrooms, computer labs, gymnasium space, large meeting spaces, cardiovascular training space and specialized labs for exercise physiology, biomechanics, and motor evaluation and development.

The College of Nursing and Health Sciences has been awarded three grants totaling more than $1.6 million from the Health Resources and Services Administration (HRSA). The grants totaling $1,601,093 to address goals in diversity, retention and training.

**DIVERSITY** - Dr. Bunny Forgione, associate professor, received an $898,263 grant for the CAREER program (Contratación Ayundano Retención Estudiante Enfermera Recurso: recruiting, helping, retaining nursing student resources) to increase nursing educational opportunities for students from disadvantaged backgrounds, including minority students who are underrepresented among registered nurses through targeted activities that will increase recruitment, retention and graduation rates.

**RETENTION** - In response to the dramatic shortage of nurses in Texas and across the nation, Dr. Mary Jane Hamilton, dean of the College of Nursing and Health Sciences, received $635,187 to offer an eLine Military program (ELM) for Texas residents serving in the military or veterans with prior medical experience.

Beginning in spring 2011, ELM will be available entirely online and will facilitate access to a full curriculum for a bachelor’s degree in nursing and RN license. It will allow military personnel to seamlessly process through the curriculum without repeating prior content, which will accelerate their completion and allow for college credit based on medical experience in the field while serving the military.

The program, which focuses on minority students who are underrepresented in the field of nursing, rural students, and those who are from disadvantaged backgrounds, will employ a case manager who will provide the key support, guidance and expertise to students so that they may access other mainstream resources.

University President Flavius Killebrew was joined by Texas A&M University System representatives and state officials at the grand opening celebration for Island Hall on June 29. Speakers included Texas State Sen. Juan “Chuy” Hinojosa, Texas Higher Education Coordinating Board Chairman Fred Heldenfels IV, Texas A&M University System Regent Jim Wilson, Texas A&M University System Chancellor Michael McKinney and Dr. Killebrew.

**TRAINING** - Dr. Eve Layman, associate professor, received a $67,643 grant to support the Professional Nurse Traineeship Program to prepare registered nurses for advanced nursing positions in primary care and administration in Texas. The College of Nursing and Health Sciences will allocate funds from the Advanced Education in Nursing Traineeship program to Family Nurse Practitioner or nursing administration students in their last 12 months of the Master of Science in Nursing (MSN) program.

The kinesiology labs include a heated pool with underwater video feedback.
YOUNG RECEIVES LEadershIP AWARD FROM TCTM

Dr. Elaine Young, an associate professor of mathematics, has received the 2010 Leadership Award from the Texas Council of Teachers of Mathematics (TCTM). The award is presented to an outstanding leader in mathematics education who supports teachers at the local and state level. Young was recognized for her work in the Corpus Christi area, including her role as a teacher of teachers at Texas A&M University-Corpus Christi. She is a founding member of the Coastal Council of Teachers of Mathematics and serves as the advisor for the student affiliate CTM. She was also cited for her work as co-chair of the “ME by the Sea” conference that emphasizes curriculum alignment and mathematics engagement for students from pre-kindergarten through college.

CIFUENTES NAMED ASSOCIATE VICE PRESIDENT FOR RESEARCH AND DEAN OF GRADUATE STUDIES

Dr. Luis A. Cifuentes became the University’s new associate vice president for Research and dean of Graduate Studies on Sept. 1. Cifuentes has been a scientist and faculty member in the Department of Oceanography at Texas A&M University for more than 20 years. He has been with the College of Geosciences administration since January 2003 and served in several positions, most recently as the college’s executive associate dean and associate dean for research. In his position, Cifuentes chairs the Research and Scholarly Activity Council and is a member of the Graduate Council. He leads both the research office with its responsibilities for research development, research administration, and research compliance as well as the office of graduate studies with its responsibilities for supporting and growing graduate programs. Cifuentes replaces Dr. Harvey Knell who retired this summer after 10 years at the University.

SMITH INDUCTED AS AMERICAN COUNSELING ASSOCIATION FELLOW

Dr. Robert L. Smith, professor and chair in the Counseling and Educational Psychology Department, has been inducted as a Fellow by the American Counseling Association (ACA), the world’s largest private, not-for-profit organization for professional counselors. The designation, which is the highest honor awarded by the 42,000-member association, recognizes ACA members who have made significant and unique contributions in professional practice, scientific achievement, and governance, or teaching and training, and have made important contributions to the counseling profession. Smith has served as president of the International Association of Marriage and Family Counselors, and the National Career Development Association. He has been a leader in developing graduate masters’ and doctoral programs in counseling within the United States and other countries including Venezuela, Mexico and Nicaragua.

VOKURKA APPOINTED TO BALDRIGE AWARD BOARD OF DIRECTORS

Dr. Robert Vokurka, chair of the Department of Finance, Economics and Decision Sciences at Texas A&M University-Corpus Christi, has been appointed to the 2010 Board of Directors for the Malcolm Baldrige National Quality Award. The award, created by public law in 1987, is the highest level of national recognition for performance excellence that a U.S. organization can receive. This is the 11th year that Vokurka has been named to the board composed of approximately 500 leading experts from industry, professional and trade organizations, education and health care organizations and government.

TUNNELL HONORED FOR ENVIRONMENTAL CONSERVATION

Dr. Wes Tunnell, associate director of the University’s Harte Research Institute for Gulf of Mexico Studies, recently received two recognitions for his work in the field of environmental conservation. The Rotary Club of Corpus Christi presented Tunnell with the Harvey Weil Professional Conservationist of the Year award. Each year, the award is presented to an individual who has dedicated their career to educational, research, and informational activities in support of wildlife conservation. The “Loggerhead Challenge,” a regional competition of the National Ocean Science Bowl, created the Dr. Wes Tunnell Sportsmanship Award that will be presented to the team that embodies the spirit of earnest competition during the annual event held in Corpus Christi. The honor was bestowed in recognition of Tunnell’s leadership and dedication in educating others about ocean and coastal environments.

DRUM ELECTED PRESIDENT OF STUDENT AFFAIRS ORGANIZATION

Dr. Amanda Drum, director of University Housing, has been elected to a one-year term as president of the Texas Association of College and University Student Personnel Administration, the state organization for Student Affairs. Membership includes professionals at all levels and in all positions in student development fields. Counselors,

ZEBA NAMED 2010 PIPER FOUNDATION PROFESSOR

Dr. Awni Zebda, a professor of Accounting, has been selected as a Piper Professor for 2010 by the Minnie Stevens Piper Foundation. Each academic year, the nonprofit, charitable corporation honors 15 professors from across Texas for their dedication to the teaching profession and their outstanding academic, scientific and scholarly achievement. Each Piper Professor receives a certificate of merit, a gold pin and a $5,000 honorarium.

Over the past 16 years, Zebda has developed and taught several undergraduate and graduate courses, including cost accounting, managerial accounting, controllership, and strategic cost management. He has received numerous awards for his teaching, service, and research, including the Accounting Society Outstanding Professor Award, Distinguished Faculty Achievement Award given by the University’s Alumni Association, Texas Society of Certified Public Accountants Outstanding Educator, and Texas A&M University System Regents Professor.
Sandra Arismendez was fascinated by ocean life at an early age. But it wasn’t until she viewed photos of coral reefs, barrel sponges, brightly-colored fish and sea anemones taken from Dr. Wes Tunnell’s Coral Reef Ecology class trips to the Caribbean that she realized she wanted to become a scientist.

In the 1990s, the University undergraduate student worked for Tunnell, a Texas coastal and coral reef ecologist who joined the faculty in 1974. Over the last 17 years, the Island University has outfitted Arismendez with unlimited access to field experience and mentoring from Tunnell.

“He saw potential in me and he nurtured that potential,” says Arismendez, a post doctoral research associate with the University’s Harte Research Institute for Gulf of Mexico Studies. “He opened doors for me and always had research projects that provided me with invaluable experience. In the end, taking on these projects made me a more marketable graduate.”

Raised in Skidmore, Texas, Arismendez was one of nine children and the first of her siblings to earn a four-year degree. In May, she received her Ph.D. in Coastal and Marine System Science and was selected as a spring commencement speaker. In the audience was her daughter, Krystal Alvarado, who graduated that same day with a bachelor’s degree in chemistry and started her master’s degree in education this fall.

Arismendez earned her Bachelor of Science in Biology in 1993 from Corpus Christi State University and her Master of Science in Biology from Texas A&M University-Corpus Christi in 1996. While a graduate student, she conducted thesis research in Veracruz, Mexico, and was on the University’s scientific dive team that participated in research in the Gulf of Mexico and Caribbean Sea.

But after receiving her master’s degree, Arismendez, a single parent, decided to focus on her career and raising her child. In 1996, she became a natural resource coastal planner for the Corpus Christi Bay National Estuary Program and, three years later, she joined the Texas Commission on Environmental Quality in Austin, Texas, as an aquatic scientist and project manager, where she worked for seven years.

In spring 2006, Tunnell informed Arismendez that he had received funding to support a Ph.D. student, so she applied to the Coastal and Marine System Science Ph.D. Program. She was accepted and returned to the University that fall.

“Coming back as an experienced professional played a huge role in my ability to finish the program in less than four years,” Arismendez says. “I was more disciplined and focused. My research was driven by my professional experiences and I had a clear idea of the research I wanted to conduct.”

With her expertise in land-water nutrient coupling processes, Arismendez examines the effect land uses have on nutrient water quality and biogeochemical cycling on coastal watersheds and estuaries. She has received many awardss and scholarships, including the NOAA Environmental Cooperative Science Center Doctoral Fellowship and the Texas A&M-Corpus Christi Association’s Young Alumni Award. She was winner of the fourth annual Graduate Student Scholarly Works Symposium held in spring 2010.

With three degrees from the Island University, she is optimistic about the future.

“The ideal scenario would be to become a professor at a coastal university like Texas A&M-Corpus Christi, continue to do research and inspire students through teaching in much the same way I have been inspired by my mentors,” she says.

HAVE YOU HEARD?

COLLEGE OF BUSINESS

Shirald Dean Hendrix '60 BBA General Business owned a marketing consulting firm for 10 years since retiring from Chevron. He and his wife, Suzy, split their time between their home in The Woodlands, Texas, and their property in Polk County, Texas. They enjoy four grandchildren, traveling, gardening, and collecting Gulf Oil company memorabilia.

James M. Billings '52 BS Accounting and his wife, Pearl, will celebrate their 50th wedding anniversary on Dec. 19. James and Pearl are both retired and have spent most of their vacations over the years traveling to all 50 states, plus France, England, Belgium and Holland. They have completed their family genealogy quest and have it in print.

Leonard Allen Schlueter '68 BS Business Administration had gastric bypass surgery in May 2009. He no longer has to take his diabetic or blood pressure medicines. He has also lost 150 pounds and in July 2010, he had a successful hip replacement surgery. He keeps busy doing work on his house in Austin, Texas.

Janice “Jan” Richards ’80 BBA General Business has been employed by Texas A&M University for more than 20 years. She and her husband, Jimmy, a residential framer in College Station, are both avid, competitive skydivers and met in 1983 at the Aggies over Texas Drop Zone in Bryan, Texas. Erik Burciaga ’09 BBA Management is a sales coordinator for Cup Graphics in Corpus Christi. He hopes to win the Harbor Half and Corpus Christi Half Marathon. Erik welcomed two puppies to his family.
ALUM’S ORDINARY DAY OFTEN INCLUDES EXTRAORDINARY EVENTS

Working for CNN for 22 years, Mark Brachowski has played an integral part in broadcasting historical milestones and breaking news to millions of viewers all over the world.

Brachowski worked tirelessly behind the scenes at the Berlin Wall came down, and during the first and second Gulf Wars and the 9/11 terrorist attacks on the World Trade Center and the Pentagon.

In the last decade, he has witnessed the death and devastation caused by natural disasters including the 2004 Indian Ocean Tsunami, which claimed around 200,000 lives, and Hurricane Katrina which a year later devastated the Gulf Coast.

“When you have such extraordinary events, it changes your day-to-day work,” says Brachowski, director for CNN Technical Operations in Atlanta, Ga. “These events become the main focus of your shows. You get an adrenaline rush when you’re trying to sort out everything that’s happened, and things happen fast.”

Brachowski, who is a 1982 graduate of Corpus Christi’s Carroll High School, is a multi-network director for several sister networks including HLN and truTV. He oversees anchors, camera operators, floor directors and technical personnel, and directs all live news programs including “Morning Express with Robin Meade,” “Issues with Jane Velez-Mitchell,” HLN Prime News,” “CNN Newsroom,” and many other shows. In addition, he has received two Peabody awards for excellence in broadcast journalism.

Brachowski received his Bachelor of Arts in Communications in Television/Filmmaking December 1986 from Corpus Christi State University. He took classes with Dr. Bill Huie and worked for two years as Huie’s student liaison on the “CCSU Today” cable access show.

“What I liked about the TV/Film program was the hands-on experience,” Brachowski says. “You could always get in the studio, check out the equipment and take it home on the weekends. The environment was conducive for learning.”

Reflecting on his film history class, Brachowski says he learned the importance of lighting, camera angles and other elements such as shadows and music. Today he utilizes that knowledge in the studio.

“It’s not just like you’re turning a camera on and acting,” he says. “Editing can change your whole story. It’s not just like you’re turning a camera on and acting.”

“Editing can change your whole story,” Hui taught him the many elements that can change the outcome and meaning of a film. All of that transfers into television. “I’m working with audio, camera and graphics. How we present it affects the outcome and it’s up to me to bring all those elements together.”

After graduation, Brachowski did freelance work for television commercials and low-budget films in Austin, Texas. Since work was seasonal, he began looking for more regular work. In 1988, he was hired by CNN and moved to Atlanta, Ga., where he met his wife Gabriela. As a video journalist, he worked his way through the ranks running cameras and teleprompters.

“I love what I do,” says Brachowski. “CNN is on the forefront of all the technologies and always changing. There are a lot of talented people here and you get bored because no two days are the same. The big news days are the most exciting. It’s a challenge to do live news because there are so many people and everybody is watching.”

Upcoming Events

**Nov. 10**  Alumni Awards Nominations Due
Nominate an alumnus who has made a significant contribution to society and is a great representative of this University.

**Nov. 15**  A&M-CC vs. A&M-College Station Men’s Basketball Game

ALUMNI NEWS
HAVE YOU HEARD continued

Dianna Doebbler ’09 BBA Accounting will receive her Master of Accountancy in December. She is an accountant at the Oasis Home Healthcare.

Margaret E. Thompson ’10 BBA Accounting completed the degree she began 36 years ago at the University of Corpus Christi. She finished her coursework in her first summer session and welcomed her first grandchild that same month.

COLLEGE OF EDUCATION

Elma D. Holden ’65 BS Elementary Education proudly announces that the last of her four grandchildren graduated from Texas State University on Aug. 13. She recalls being the first in her family to go to college. She received her master’s degree after her husband’s death and served as an elementary school counselor for many years. She had cancer surgery, retired and remarried all within a year’s time.

Jamye Lynn Johnston Aldape ’73 BS English celebrated 37 years of marriage to her husband, Robert, an engineer for AT&T in June 2010. She has three grandchildren. Her oldest son, David, is a Houston firefighter and Aaron, her youngest, is in his final year of residency. She teaches English as a Second Language (ESOL) in high school and anticipates retiring in two years.

Theus Joseph Sheil ’79 MA Interdisciplinary Study is a life and financial services agent for Farmers Insurance Group.

Rosemary H. Lara ’80 BS Education received her librarian certification from Sam Houston State University after 30 years in the classroom. She is a librarian for Smith Elementary in the Victoria Independent School District in Victoria, Texas. Her daughter, Annalisa, attends Texas A&M-Corpus Christi, majoring in special education with an emphasis on deaf education.

David Guel ’91 MS Educational Administration has retired from his education career after 32 years and has embarked on a new career as an independent insurance agent. His primary focus is working with refiners and investment plans. His sons attend Southwestern Medical School in Dallas, Texas, and Texas A&M in College Station.

Carol Denise Ziegler ’85 BS Secondary Education began her 19th year of teaching at Dosse Intermediate School at the Klein ISD in Spring, Texas, where she is the head volleyball coach and assistant track coach. She has two daughters, Ashley, 26, and Jenna, 23. Her grandson Easton is 3.

Patricia J. Castaneda ’94 BS Occupational Training and Development is a childcare consultant for the North Carolina Department of Health and Human Services. She has two grandsons, Micah, 17, and Nathan, 3.

Pamela Neven ’97 BS Kinesiology is an instructional technologist with Keller Independent School District in Keller, Texas. She assists teachers in using technology as a tool to teach their students.

Cindy Ann Ybanez ’97 BS Occupational Training and Development has been working for the United States Army for the past two years as a school liaison officer. She works with military families and all school districts in the San Antonio, Texas, area to ease the transition of the military students.

Jami Lea Spacek ’02 BSIS Early Childhood Education married Brandon Bryce on Aug. 29, 2009. They had their first child, Tanner James, on June 29. Jami is an instructional technology specialist at North East ISD in Bexar County, Texas.

David L. Garcia ’03 BS Occupational Training and Development is an industrial specialist for the Corpus Christi Army Depot. David became a proud grandpa on Nov. 24, 2009, when his daughter, Victoria, gave birth to Mia Gabriella Garza.

Tiffany Gunter Tenpenny ’03 BSIS Early Childhood Education welcomed a baby girl on June 16.

Margaret Pantoja ’05 BSIS Interdisciplinary Study is excited to announce that her son, Matthew, will begin his high school years at King High School in Corpus Christi. Her son attended the Boy Scout National Jamboree held in Fort Ambrose Powell Hill, Va., and has begun his Eagle Scout project for Troop 255.

Marc Claire Oncle ’06 BS Kinesiology is working as a graduate assistant at Middle Tennessee University in Murfreesboro, Tenn. She is working on her Master of Science in recreation and plans to graduate in May 2011.

Chris Casarez ’07 BS Kinesiology has a son, Jakobi, who is seven months old. Chris is in his second year as a special education science teacher at Putnam City High School in Warr Acres, Okla.

Criselda Cavazos ’07 BSIS Interdisciplinary Studies will celebrate her husband’s birthday and their second anniversary in Las Vegas, Nev.

John Willis Porter ’07 BSIS Interdisciplinary Study graduated from Lamar University in Beaumont, Texas, with a master’s degree in educational administration. He welcomed a son in October 2009.

Sandra Jacoby ’08 BSIS Generalist EC-4 teaches pre-K inclusion for Fredericksburg ISD in Fredericksburg, Texas. She is looking forward to her new teaching career. She also started a photography business called “Photography by Sandra.”

Andrea Johnson’s ’08 MS Elementary Education is a part of the math team that designed the new scope and sequence for the Corpus Christi ISD.

Jessica B. West ’08 BS Kinesiology moved back to the Coastal Bend area in February and began a new job in August. She is excited to start a new chapter in her life.

Samantha Chase ’09 MS Elementary Education is an electronic learning assessment resource eighth grade teacher with the Corpus Christi ISD.

COLLEGE OF LIBERAL ARTS

Joseph A. Piegarri ’70 BS History retired from B/E Aerospace in 2007 after working as the corporate vice president of human resources for 26 years. Prior to that, Joseph was a teacher for 11 years.

Oscar N. Hernandez ’79 BS Criminal Justice is amazed at how beautiful the Texas A&M University-Corpus Christi campus has become since he graduated. He remembers when there were only two or three buildings. He never imagined such a massive expansion and promises to keep visiting and admiring the new additions.

Diane Goforth Bray ’86 BA Art moved from the beach in Galveston, Texas, to the “Cowboy Capital of the World,” Bandera, Texas, and is closer to her first grandchild. Diane opened a shop called “Cowgirl’s Corner” with a fellow teacher in the city’s historic Eleventh Street Mercantile Building where 37 of her paintings are exhibited in this gallery and western treasures shop.

Linda Jo Hotcavey ’91 BA Communication is in her 20th year teaching with the Brownsville, Texas, ISD. She received her English as a Second Language certification and is teaching English Composition II. After a five-year absence, she has returned to coaching volleyball. Her children are now 10 and 13.

Gilda E. Ramirez ’92 BA Communication is the director of Student Services for the College of Education and a member of the College Finances & GEAR UPSTAR Faculty Fellows at Texas A&M University-Corpus Christi. She enjoys de-stressing by spending play time with her four grandchildren ages 2, 3, 4 and 9.

Jan Grimes Simmacher ’93 BA Political Science is a transportation planning coordinator for the city of College Station Planning and Development Services in College Station, Texas.

Lee M. Floyd ’94 BA Sociology is a Baptist student ministry director for the Baptist General Convention of Texas. He resides in San Angelo, Texas.

Rosalind W. Sobosle ’95 BA Communication has been married to Mark Sobosle, an air traffic controller at Hobby Airport, for 17 years. They have two kids, Haley, 13, who plays on a traveling volleyball team, and Peyton, 9, who plays lacrosse and was selected for the all-star baseball team this spring. Between work and sports they are really busy, but love every minute of it.

Lydia Bianco ’97 BA Communication finished production on “The Untitled Ivan Reitman Project” starring Natalie Portman and Ashton Kutcher due in theaters in early 2011. She also worked on “Little Birds,” starring Kate Bosworth and Leslie Mann, due this year and “Sympathy for Delicious,” both among Natalia and Ashton Kutcher due in theaters in early 2011. She also worked on “Little Birds,” starring Kate Bosworth and Leslie Mann, due this year and “Sympathy for Delicious,” and “Aaseelah’s Journey,” shot entirely in Iowa.

continued page 23
Herlinda Rojas Sweeney ’97 BA English is a lieutenant commander in the U.S. Navy and is stationed in Norfolk, Va.

Armando Valdez ’97 BA History celebrated the second birthday of Arianna Clara Valdez, his daughter, in San Antonio, Texas, where he resides and attends graduate school. Armando recently completed his first marathon.

Rosa M. Valdez ’98 BA Sociology is a marketing sales representative for the Texas Industry for the Blind and Handicap in Corpus Christi. Her grandson, Jason H. Valdez, is preparing to be a Texas A&M University-Corpus Christi student by cramming for his high school finals in his Texas A&M-Corpus Christi T-shirt.

Rudy Anderson ’99 BA Communication is part of the division for blind services staff in Corpus Christi. He works in partnership with Texans who are blind or visually impaired to get high quality jobs and live independently, and helps children receive the training needed to be successful in school.

Edith Z. Cahlik ’98 BA Communication, ’00 MS Counseling Psychology and Guidance is married to her beloved husband of 16 years, Mark Cahlik. They moved back to Corpus Christi from Ohio.

Velma Sanchez ’99 BA Psychology has a daughter who is now two years old. Velma is a human resources and training manager at URS Washington Division in Austin, Texas.

Rebecca Ramirez Vela ’99 BS Criminal Justice is a paralegal for the Gutierrez Law Firm in Alice, Texas. Her daughter, Jennifer Denise Vela, graduated from Texas A&M University-Corpus Christi in August with a Master of Science in counseling with dual concentration in mental health and family and marriage counseling.

Jennifer A. Wenger ’99 BS Criminal Justice has a daughter, Courtney, who just graduated high school and will be following her mother’s footsteps by majoring in criminal justice with a minor in psychology.

Roger A. Fortner ’00 BA Political Science is selling alarm systems for ADT Home Security, an award-winning home security system, in Fountain Valley, Calif.

Edgar Rivera ’00 MPA Public Administration is a supervisory border patrol agent for the U.S. Border Patrol. He and his wife, Karry, moved back to Texas after nine years living in San Diego, Calif.

Veronica D. Ramirez ’01 BM Music while performing in “Last Lists of My Mad Mother,” Veronica was cast in the Laredo Theater Guild International’s summer production of “The Sound of Music,” in the role of Mother Abbess. During her rehearsals, she planned the year-end student recital for her students of her music studio, Bella Nota Vocal Studio.

The Road Less Traveled

UNIVERSITY OF CORPUS CHRISTI GRADUATE SPENDS 29 YEARS PREACHING GOSPEL IN AFRICA

As a teenager growing up in Houston, Texas, Ernest Sibley felt the call of the pulpit. But, when he moved to Corpus Christi to go to college and preach part-time at a small church in Aransas Pass, little did he know that the path he had chosen would lead him to the small African nation of Malawi, one of the least developed and most densely populated countries in the world.

Sibley enrolled at the University of Corpus Christi and graduated with a Bachelor of Arts in Bible in 1961. After graduation, Sibley moved to Fort Worth, Texas, where he met his future wife, Auttie, and earned a master’s degree in Theology at Southwestern Baptist Theological Seminary. In 1972, after seven years as a pastor in Houston the International Mission Board appointed him to serve in Malawi. By then, he and Auttie were married with two children, Samuel, 8, and Alicia, 3. A third child, Anastacia, was born in 1979.

“I helped start many new churches in different villages,” says Sibley, who lived in Blantyre, Malawi’s largest city. “The people of Malawi were friendly and hospitable. When I arrived to preach, I was provided with one of the few chairs in the village. Then one by one, they would welcome me personally.”

Sibley traveled from village to village, staying overnight in one of the mud brick homes of his parishioners. Worship services were joyous events filled with the sounds of clapping, dancing, and the singing of traditional hymns. Many times, baptisms were held at a nearby river and followed by a feast of cornmeal and chicken, grains or beans.

Sibley was surrounded by mountains and lakes, including Lake Malawi, one of the largest bodies of freshwater in the world. He and his family climbed mountains, fished, picked raspberries, enjoyed the lake, read and played dominoes and many board games.

“It was a peaceful place to raise a family,” says Sibley. “I enjoyed my time in the villages because it was like camping out. But, it was also an adventure. At the river, we’d see crocodiles and hippos.”

But there was also the threat of yellow fever, malaria, and cholera, which claimed the lives of many people, including missionaries. His own family members came down with malaria more than once and had occasional bouts with dysentery. Drought was a constant concern and the Malawians were always just a dry spell away from hunger.

“They completely depended on crops,” he says. “We were always praying for rain. If we didn’t receive enough, we had to get corn from outside the country. Clean water was a big issue so we oversaw many well projects.”

During his 29 years as a missionary, Sibley managed around 35 churches, trained new pastors and preached in the native Chichewa language. He retired in 2001 and today is a part-time data processor in Bryan-College Station, Texas. He and Auttie have four grandchildren.

In February, Sibley returned to campus to participate in the University’s Homecoming festivities. It was the first time he had seen the Island University in almost 50 years.

“I have many fond memories of the University,” says Sibley. “When I was student, I spent many hours sitting at the edge of the bay. That was leisure time for me.”
Vanessa Ballmer ’04 BA English and husband Luis Castillo ’07 MBA Business Administration live in Houston, Texas. She returned to the classroom in fall 2010 as adjunct instructor of English in the Lone Star College System.

Amando Raul Cantu ’04 BA Communication, ’06 MS Secondary Education is a site coordinator for the GEAR UP III “Creating a Vision” Program for the Office of Special Programs at Texas A&M International University in Laredo, Texas.

Jennifer Catalani ’04 BA Psychology has worked as a resource and external relations specialist for the Texas Department of Family and Protective Services Adult Protective Services division in Corpus Christi since November 2008.

Marie D. Metting-Boles ’04 BFA Art is a designer at Main Flower & Gift Shop in Yorktown, Texas. She is also developing an art program with her local museum.

Catherine “Katie” Killeen ’04 BA Psychology and husband Chris Storey ’04 BS Mathematics are expecting their second boy, Ryan, in November. Katie is a full-time mom and Chris is a research engineer at the Southwest Research Institute in San Antonio, Texas.

Gregory Lee Diehlman ’05 BS Criminal Justice is seeking his doctorate in public safety, with a concentration in criminal justice.

Niomi Jean Fuentes ’05 BA Psychology has enjoyed summer with her nephews running around and having lazy days and fun outings. Her work is busy and she is helping get her company ready for AAS certification. She and her boyfriend learn more about each other all the time and everyday she finds a new reason to love and admire him.

Geneva Gonzales ’05 BS Criminal Justice is a stay at home mom. She has three beautiful children, girls ages 2 and 12, and a boy, 15.

Janice Audra Hale ’05 BA Theatre moved back home to continue her education at Texas A&M University-Corpus Christi where she is pursuing her Master of Science in secondary education.

Jason Pruett ’05 BA Communication relocated to San Antonio, Texas, after accepting the position of video marketing specialist with NewTek, in April.

Michelle Renee Brauchle McDowell ’06 BA English is pursuing her doctorate in education with a reading and literacy specialization.

Brian Tullis ’07 BS Criminal Justice works in the Special Investigative Unit of the Texas Alcoholic Beverage Commission. He coaches little league football and is an avid fisherman. He is in the master’s in public administration program at Texas A&M University-Corpus Christi.

Jacquelin W. Boulidin ’08 BA Communication works for the Gemini Ambulance Service. Somers Dean ’08 BA Psychology is a full-time shift supervisor at Starbucks. She is working on her master’s in counseling.

Ann Marie Godines ’08 BA Psychology is in her last semester as a graduate student in marriage and family counseling. She is proud to announce that her 17-year-old daughter, Krissey, will attend Texas A&M University-Corpus Christi.

Angelica Rivera ’06 BS Criminal Justice is an executive assistant to the president at RGA Galen Incorporated in Corpus Christi. She has a one-year-old daughter.

Shannon Shackelford ’06 BA Psychology has been working in the United States Army, “HOOAH!” With God all things are possible. He thanks his family and friends, Pamela, Tyla and Tyra, for their prayers and thoughts over the years. He knows he wouldn’t have made it without them. He has met a lot of good people during his career.

Jessica Shirley ’06 BA Psychology is self-employed.

Lacey Beth David ’07 BS Criminal Justice has worked for Dr. Kathryn Soward, a private psychologist, since January 2009. She does play therapy with children mostly ages 3 to 5 at the surrounding Head Starts. Her job is amazing and she loves making a difference in children’s lives.

Yadira C. Gonzales ’07 BA Communication is pursuing a master’s degree at Texas A&M University.

Gavarse Vashad Jones ’07 BS Criminal Justice is a discharge and resource specialist for United HealthCare. He has been there for three years and each year he has been graciously promoted. In the near future, he plans to attend graduate school to further his education in the field of psychology.

Jamie Laine Lashua ’07 BA English married James Maldonado and began her career at Sinton High School in Sinton, Texas, in August 2009. She teaches inclusion with the special education department and is also the new cheerleading sponsor.

Angela Perryman ’07 BS Criminal Justice is going to school to become a medical laboratory technician and loves the program. Her children are funny and have four legs.

Holly Knippa ’08 BS Criminal Justice had a wonderful wedding with family and friends June 12, and hopes to add to the family soon. She is also getting her second bachelor’s in psychology and hopes to pursue a master’s degree.

Christina JoAnn Martinez ’08 BA English has started her second year as an English teacher at Zapata High School and is the school’s cheerleading coach.

Brooke Seyfert ’08 BA Psychology is a second year graduate student at Michigan State University in East Lansing, Mich., working on her master’s degree in counseling. She received the M.A. Counseling Scholaristic Achievement Award and the Excellence in Diversity Award in the spring. Brooke is also a certified life child specialist.

Wayne Smith ’08 BA Psychology, ’08 BA Sociology is working on his master’s in clinical psychology at Texas A&M University-Corpus Christi. He is a supervisor at Avail Solutions and instructs others to become successful crisis workers. He began working as a teaching assistant for experimental psychology this fall and instructs the lab section for the course. He is deeply in love with Niomi Fuentes.

Don Patrick Trahan, Jr. ’08 BA Psychology is pursuing a Ph.D. in counselor education and supervision with a minor in family studies at the University of New Mexico in Albuquerque, N.M.

Roxanna Rodriguez-Johnson ’08 BA Criminal Justice, ’09 BA Political Science married Kevin Johnson ’10 BS Criminal Justice on July 18, 2009. She is an adult probation officer for Nueces County Community Supervision and Corrections Department in Corpus Christi.

John James Shaw ’09 BA History owns a comic book store, “Midnight Comics & Games,” on the west side of Houston, Texas, and is living the American dream of being a small business owner.

Travis James Washmon ’09 BA English is an English teacher at Arlington High School in Arlington, Texas, where he is also the junior varsity baseball coach.

Danielle Whiteside ’09 BM Music moved to Denton, Texas, to begin a master’s program in musicology. Her son is growing faster than she could ever have imagined and is already trying to walk.

Carlos Jaime Martinez ’09 BA Theatre is an English language acquisition teacher at Zapata Middle School in Zapata, Texas. She has completed one year of teaching and is looking forward to many more.

John T. Baker
2009 Outstanding Alumnus Award
The beauty of the Dr. Hector P. Garcia Plaza embraces the first days of Fall 2010 classes.
Universities throughout our nation are continually becoming more dependent upon the generosity of private donors to provide the essential dollars required to reach new levels of excellence. It is the nature of an institution growing stronger to require support beyond what can be procured through appropriations and tuition.

Just as Texas A&M University-Corpus Christi is committed to the well-being of its greater community, many businesses and professionals see the University as an investment toward the growth of a quality, global-minded workforce. The Achieve Partnership program provides the opportunity for many to support students first-hand through scholarships which help defray the costs of tuition and fees.

The Achieve Partnership program offers an excellent venue for supporting our youth who aspire to become leaders within many industries during their careers. Please consider how your gift today can develop the future of a student who one day may improve the quality of your life.
There should be no limit to how great a student’s future can become after graduation. Your support of the annual Islander Fund puts essential dollars into numerous initiatives throughout Texas A&M University-Corpus Christi which shape student experiences. Funds provide the needed support to place students into national academic competition, engage conference participation among their brightest peers, and undertake groundbreaking research.

*It's not what you give, it's that you give.*
