Cover Story

Mission Accomplished

Capital Campaign exceeds expectations
Helping out freshmen biology majors has recently made me wake up and realize that my undergraduate career is almost over. This past summer, I had the fantastic opportunity to work as a marine mammal training intern at the Vancouver Aquarium in Canada. I got to interact with and help train beluga whales and sea otters as well as learn about the career from the inside out from some of the best trainers in the business. It was, without a doubt, the best summer of my life.

There are so many great memories from my internship but one of my most cherished comes from my last day in Vancouver. I was done with my internship but went to the aquarium one last time. I walked by the underwater viewing area at the sea otter habitat where one of the otters, and my favorite, Milo, was swimming. He saw me and swam over to me at the glass. I moved over to the right, then back over, and all around the glass and he followed me the whole time. That moment, along with so many others, is what strengthened my resolve to become a marine mammal trainer, working with dolphins, whales, seals, or sea otters like Milo.

In this career field, hands-on experience is essential and the internship in Vancouver helped me tremendously. I wouldn’t have even thought an internship was possible if it hadn’t been for the President’s Council Scholarship. Unpaid internships aren’t cheap and because of your support of the scholarship, I was able to focus on learning and making memories that will last the rest of my life.

The President’s Council has grown to become our most prestigious private giving society. It is part of the annual giving program, and is rich in tradition. Members of the President’s Council support the Presidential Scholars program, the highest-level scholarship awarded to our best and brightest students. Funds also are used for numerous annual activities and programs implemented through the President’s Office which further build upon community engagement.

As a member of the President’s Council, you become our partner in progress, because your support helps guide us toward the many milestones we will reach.

MEMBER BENEFITS
Membership in the President’s Council places you among individuals who continually focus their efforts on the vitality of Texas A&M-Corpus Christi. You are both an advisor and a friend to the University. Throughout the year we have many events and activities in which you have the opportunity to meet with fellow President’s Council members. We greatly appreciate the support of this devoted group and ensure ample recognition.

ON THE COVER
Texas A&M University-Corpus Christi students, alumni, donors, and friends celebrate the Momentum Capital Campaign goal at the State of the University luncheon on September 14, 2011. The Momentum Capital Campaign chairs joined in as the final numbers were revealed.

Last fall, we met a major goal of Momentum 2015 when, for the first time, we welcomed more than 10,000 students to the Island University. One year later, we are celebrating the success of the Momentum Capital Campaign which raised more than $37 million to fund scholarships, academic programs, and campus-wide programs at Texas A&M University-Corpus Christi.

It was gratifying to announce that we had exceeded not only our $25 million goal but also our $30 million challenge goal to a packed house at the final State of the University luncheon. These are especially challenging times for higher education in Texas and, with the reduction in state revenue, it is more important than ever that we adhere to the guiding principles for maintaining academic excellence, increasing student enrollment, and expanding external funding for sponsored projects, and research and development.

In 2009, we realized that the state of Texas would soon enter challenging times and launched a campus-wide effort to identify and implement efficiencies that reduce operating costs in light of the anticipated shortfall. Two years later, we are building more energy efficient buildings, moving rapidly to electronic-based documentations, and asking employees to expand their roles so that we can increase our student numbers without adding greatly to our workforce.

More challenges lie ahead in the coming years including the prospect of additional cuts in state funding during the next legislative session. However, the future success of Texas A&M-Corpus Christi is assured thanks to the commitment and perseverance of elected representatives who share our vision, the generosity of private donors who understand clearly the challenges ahead, and faculty and staff who are committed to the vision of the Island University. It is through their unwavering support that the University’s academic credentials are being enhanced as we graduate highly-skilled professionals who are equipped to meet the demands and challenges of our complex and rapidly-changing world.

Campus Briefs

Donors Honored for Cumulative Contributions to University

Individuals, businesses and organizations were honored for cumulative contributions made to Texas A&M University-Corpus Christi during the President’s Recognition Dinner held Jan. 21. Awards were: Estill Foundation and Ewing Halsell Foundation, Platinum Inner Circle of Excellence (gifts of $1 million to $9,999,999); Karen and Larry Urban and Port Corpus Christi, Silver Inner Circle of Excellence (gifts of $250,000 to $499,999); Industrial Fabricators of Corpus Christi, The LC Foundation, Inc., Corpus Christi Roadrunners, Inc., Bronze Inner Circle of Excellence (gifts of $100,000 to $249,999); and Elizabeth Sefcik, Ph.D., Heritage Society (planned gifts).

Documents Provide Historically-Valuable Research Material

The Special Collections and Archives Department of the Mary and Jeff Bell Library has received donations of historical documents and materials this year that will provide valuable primary research materials for students and scholars from a variety of academic disciplines.

Documents spanning the career of former U.S. Congressman Solomon P. Ortiz were formally donated to the University in June. The collection documenting Ortiz’s more than 25 years in office reflects his contributions to military, transportation, trade, natural resources, border security and other issues, and is the first set of United States congressional papers acquired by the University.

Representatives from the Camp Fire USA Coastal Bend Chapter donated documents in April covering the youth organization’s nearly 75 years as one of the most successful youth organizations in South Texas. From 1937 through 2010, thousands of girls in grades two through 12 from five Coastal Bend counties participated in Camp Fire USA programs.

The Hi-Fairnessee Girls Club, Corpus Christi’s oldest social and civic club for Hispanic high school girls, donated 80 years of historical materials to the University in August. The records, which include photographs, newspaper clippings, memoirs, proclamations, correspondence, and books chronicling the club’s events, provide a valuable research resource on the history of Mexican-American women in Corpus Christi.

Scholarship Fund Provides Merit-Based Awards to University Students

Dr. Flavius C. Killebrew, University president and CEO, and First Lady Kathy Killebrew have created a $30,000 account establishing the Flavius and Kathy Killebrew Dean’s Annual Scholarship Fund to provide merit-based scholarships to students from each of the University’s five colleges. Deans of the colleges may distribute the scholarships without restrictions with the exception of the College of Science and Engineering, which must award one scholarship to a biology major and one scholarship to an engineering major; and the College of Liberal Arts, which must award at least one scholarship to a student who has experience or a passion for dance.
FORBES RANKS UNIVERSITY IN TOP 20 PERCENT OF NATION’S UNDERGRADUATE INSTITUTIONS

Texas A&M University-Corpus Christi is ranked among the top 20 percent of all undergraduate institutions in the United States, according to Forbes’ 2011 list of the nation’s Top Colleges. The annual rankings, which focus on quality of teaching, career prospects, graduation rates and low levels of debt, are exclusively prepared for Forbes by the Center for College Affordability and Productivity, a Washington, D.C., think tank.

GREEN MOUNTAIN ENERGY DONATION HELPS ART MUSEUM GO SOLAR

The Art Museum of South Texas “flipped the switch” Aug. 5 for the new 25-kilowatt solar array made possible by a $140,000 donation from Green Mountain Energy Company’s Sun Club. The solar array, which consists of 108 large panels, captures and transforms sunlight into energy to help power the Museum, the first art museum in South Texas to employ a solar array to partially supply its energy. Pictured are (from left) Corpus Christi Mayor Joe Adame, Green Mountain Energy Sun Club Manager Tony Napoliello, Texas A&M University-Corpus Christi President Flavius Killebrew; and Art Museum of South Texas Director Joe Schenk. The Art Museum of South Texas is affiliated with Texas A&M-Corpus Christi.

UNIVERSITY SIGNS MOU TO ESTABLISH iWIRE LAB

Texas A&M University-Corpus Christi and Interconnect 365, a San Antonio-based technology company, have signed a Memorandum of Understanding (MOU) to establish an Innovation in Wireless Research (iWIRE) laboratory on the University campus. Interconnect 365, which specializes in research and development of wireless, 4G, high bandwidth IP networks, smart grid/home/business and smart service solutions, will fund iWIRE by providing one percent of its annual revenue with a minimum of $350,000. Dr. Ahmed Mahdy, assistant professor of computer science, will serve as director of the lab, which will be staffed with researchers, technicians, and administrative personnel.

IN MEMORIAM

John H. Crutchfield
August 10, 2011
Corpus Christi businessman and civic leader John H. Crutchfield, who helped transform the Island University into a four-year institution of higher learning, passed away on Aug. 10, 2011. He was 92.

In 1971, Crutchfield was chairman of the Upper-Level College Citizens Committee that paved the way for the University of Corpus Christi to become a four-year, state-supported institution and part of the Texas A&M University System.

Crutchfield, an Oklahoma native who lived in Corpus Christi for more than 60 years, also established the Marian and John Crutchfield Scholarship Endowment that provides financial assistance to students attending Texas A&M University-Corpus Christi.

Miriam Wagenschein
July 23, 2011
Miriam Wagenschein, a longtime professor and leader of the South Texas women’s movement, passed away on July 23, 2011. She was 89.

Wagenschein came to the Island University in 1972 as an academic planning consultant to establish the College of Arts and Humanities, now the College of Liberal Arts. When the college was created, she became dean.

In 1974, Wagenschein helped teach the University’s first course in women’s studies. In 1995, she directed the opening of the Women’s Center for Education and Service. Two professorships were created in her honor, the Dr. Miriam Wagenschein Professorship in Women and Gender Studies and the Dr. Miriam Wagenschein Professorship in Sociology.

Edward H. Harte
May 18, 2011
Former Corpus Christi-Caller Times publisher Edward H. Harte, whose generosity left a giant footprint on Texas A&M University-Corpus Christi, passed away on May 18, 2011. He was 88.

A conservationist as well as a philanthropist, in 2000, Harte donated $46 million to establish a research center at the Island University that today champions the conservation of the Gulf of Mexico. Today the HRI has six endowed chairs who are dedicated to advancing the long-term sustainable use and conservation of the Gulf of Mexico.

The Harte family contributed $3.5 million to help build the University’s showpiece Performing Arts Center as well as $1 million in unrestricted gifts to conduct the Wave of the Future Campaign.

Program Allows Students to Earn MBA Online

The College of Business now offers an online program that allows students with a Bachelor of Business Administration to earn their Master’s of Business Administration degree in as little as one year. Using the most comprehensive technology available, the Online MBA program blends high quality text and video with “clickable” materials, links and student assessments; regardless of the students’ location. The Online MBA curriculum requires the same number of credits as the on-campus MBA.
Putting the Southland Conference on Notice
New men’s basketball coach seeks to make Islanders ‘class of the league’

After taking over a men’s basketball team that’s coming off a losing season with only two returning players who have any significant Division I experience, it would be understandable if Willis Wilson mimicked the standard line about how rebuilding takes time and that fans should be patient.

Well he is. But, in this case he’s not talking years, he’s talking months.

“The team you see in November is not the team you’re going to see in January and February,” vows Wilson. “We’re going to play hard and be competitive from buzzer to buzzer. We’re not going to leave anything on the table, and by the last two weeks of the season, these kids can be pretty darned good.”

To many, that statement may seem like hyperbole. But Wilson’s assessment is backed by 25 years of coaching experience, 16 as head coach of the Rice Owls. His 219 victories and three post-season appearances rank him as the top coach in the University’s history and his resume is strengthened by his most recent stint as assistant at the University of Memphis where the team won 49 games over his two seasons and advanced to the 2011 NCAA Tournament.

To get the Islanders to that level, Wilson is banking on the mental toughness of his young players who face a daunting non-conference schedule that includes early road stops at Oklahoma State, Texas A&M, and the University of Houston. By the time Sam Houston State comes to the American Bank Center in February, Wilson expects his team to give the three-time defending Southland Conference West Division champion Bearkats all they can handle.

“People are going to see us at our best at the end of the year,” Wilson predicts. “This year’s non-conference schedule is tougher than we need, but it will be perfect for the coming years. We need to evolve in a hurry. We’re laying the foundation for the future.”

The building blocks for Wilson’s first season are Terence Jones, a junior guard who averaged 8.9 points in 31 games last year, and Chris Mast, who played in 27 games, averaging 5 points and 2.4 rebounds. The 13-man roster also lists six freshmen and two junior college transfers, making it easier to initiate the players into his vision of the future.

Wilson knows that recruiting is the key to winning and the Islanders must attract outstanding athletes to become a powerhouse like Gonzaga and George Mason, non-football universities that make their national mark on the basketball court. To do that, the Islanders must be able to compete for the best high school players in the country. And, with the connections he’s made during his many years of experience in Houston, he won’t have to look far.

“We’ve got to do a good job recruiting in Texas,” he stresses. “If a kid in this area can help us at a national level then we’ve got to be in the mix. The metropolitan areas of the state have as much basketball talent as anywhere in the nation and, once we develop a winning culture, we’ll get more of those top players.”

To attract those recruits, Wilson and his staff have to sell them on the Island University and its future as a basketball powerhouse. That means having a winning program, outstanding facilities and, most of all, having an enthusiastic fan base that reaches beyond the University and into the Coastal Bend community.

“Our goal is to be the class of the league and to give people something to be proud of and get excited about,” he states confidently. “We want to get to the point where if you want to win the Southland Conference you have to go through Corpus Christi.”
On the Rebound

**ISLANDERS WOMEN LOOK TO BOUNCE BACK FROM DISAPPOINTING, INJURY-PLAGUED SEASON**

The Texas A&M University-Corpus Christi women’s basketball team is looking to rebound from last year’s subpar season when the injury-plagued Islanders won only two games and failed to notch a victory over a Southland Conference opponent.

The 2011-12 team features seven newcomers, three freshmen and four junior college transfers. Head coach Robert Robinson will look to newcomer Verne’qua Taylor to lead the team on offense at the point guard position. Taylor, a junior college transfer from Blinn Junior College, averaged 9.45 points and 6.1 assists per game while at Blinn. Sophomore Marquesha Anderson-Sparks, who played with Taylor at Blinn, will also provide the Islanders a spark at the shooting guard position.

The Islanders return seven players, including top junior guard Jessica Jammer. Last season, Jammer averaged 8.1 points a game and collected 117 rebounds while starting 23 out of the 29 games. Senior Myeisha Myles, who was sidelined last season with an injury, will also give the Islanders a boost on offense. As a junior, Myles played in 34 of the 35 games and led the team in scoring three times during the season. Along with Jammer and Myles, the Islanders return guards Ashley Darley, Imani Dunn and Taryn Gregory, and forwards Brandi Huff and Zoey Vega-Vega.

“Taryn is our key player,” says Robinson. “She is a great point guard and we are looking for her to be our leader.”

The Islanders women’s basketball team will open their season Nov. 12 against Missouri.

The Islanders will play a tough schedule this season, opening the season at home against Big 12 opponent Missouri on Saturday, Nov. 12, in the Dugan Wellness Center, then, four days later, facing Colorado at the American Bank Center. They will also participate in the Houston Baptist and Rice Tournaments. The Islanders open Southland Conference play on the road at McNeese State on Saturday, Jan. 7, 2012, before returning to the American Bank Center to host UTSA.

**LAZENBY TO SERVE AS INTERIM DIRECTOR OF ATHLETICS THROUGH 2011-2012 SEASON**

Scott Lazenby, senior associate athletic director, assumed the role of director of Islanders athletics on an interim basis in September following the resignation of Tim Fitzpatrick to take the same position at the U.S. Coast Guard Academy.

Lazenby, who joined the Islanders staff in 2008, will serve as athletic director through the 2011-2012 academic year. As senior associate athletic director, he was in charge of overseeing the University’s compliance with all NCAA and Southland Conference rules and regulations, and assisted with the oversight of Islanders sports programs. He stresses that nothing will change under his leadership.

“Tim and I are extremely similar in the way we go about business, so there won’t be any big changes at all,” he says. “We’re going to keep moving forward and heading in the right direction.”

Before joining Texas A&M-Corpus Christi, Lazenby served as the assistant athletic director for compliance at Texas State University in San Marcos for seven years. Previously Lazenby, who earned both his bachelor’s of science and master’s degrees in Sport Management from Texas A&M University, spent two years at College Station as a compliance assistant and an advisor in the athletic academic offices.

“We are fortunate that Scott has agreed to step in and assist with a seamless transition for our athletic programs,” says University President Flavius Killebrew. “Islanders Athletics is a strong and thriving program and I am confident that we will continue to experience significant growth and success as we move through this transition.”
Advantage Islanders: Thomas J. Henry Tennis Center Provides Showcase Venue

The new $2.4 million Thomas J. Henry Tennis Center on the Momentum Campus provides a top-notch venue for the Islanders to host major tournaments and attract talented student athletes. The center, which was made possible in part by a $500,000 gift from Corpus Christi attorney Thomas J. Henry, includes 12 tennis courts built to NCAA specifications that are illuminated by a top-of-the-line Musco lighting system.

Henry is a long-time supporter of the Islanders athletic programs, which competed as an independent from 1998 until the University joined the Southland Conference (SLC) in 2006. Since then, the Islanders men’s tennis team has dominated the SLC, winning four-straight conference championships and three of the last four conference tournaments.

“Since the start of Texas A&M University-Corpus Christi’s NCAA sport’s program, I have been involved in helping them progress their vision,” says Henry. “Our community benefits from a university that believes in growth, and through the University’s leadership, I have seen them expand at an exceptional rate.”

Last season, the Islanders men’s tennis team became the first team to sweep the SLC postseason honors, winning “Player of the Year,” “Newcomer of the Year,” and “Freshman of the Year” awards. In addition, Coach Steve Moore was named the “Coach of the Year” for the fifth straight time. Since joining the SLC, the women’s team is also on the rise.

Last year, the Islanders posted a 7-4 record for a best-ever fourth-place showing and finished the season with 10-or-more wins for the fourth straight year.
Unmanned Systems Initiative increases University’s research, teaching opportunities

Two new projects being developed by Texas A&M University-Corpus Christi scientists under the Unmanned Systems Initiative (USI) are catapulting the Island University to the forefront of unmanned exploration both in the air and on the seas.

In July, the University’s Unmanned Aerial System (UAS) project received authorization from the Federal Aviation Administration to fly remote controlled aircraft into federal air space, one of only 15 authorizations held by universities in the United States. The air space, which encompasses approximately 500 square miles, is unprecedented in size and versatility, reaching several miles into the Gulf of Mexico and covering 39 miles of the Padre Island National Seashore and a substantial portion of the Laguna Madre intra-coastal waterway.

The College of Science and Engineering has also acquired a Remotely Operated Vehicle (ROV) that has been specifically configured for engineers and scientists to quickly and effectively perform a variety of basic underwater observation tasks. The underwater robotic vehicle is equipped with sensors and instruments for measurement and observation for marine species, ocean acidification, dissolved oxygen level, circulation current, plankton community change, and the onset of harmful algal blooms.

“We are committed to advancing our science and engineering base that supports sustainable growth of the Gulf of Mexico and coastal communities,” says Dr. Lea Der Chen, associate dean for research, director of the School of Engineering and Computing Sciences, and director of the Unmanned Systems Initiative. “Given the complexity of the Gulf of Mexico, the new UAS and ROV provide a safe, efficient, and cost effective means to acquire data to study the complex processes of the Gulf in the Coastal Bend region.”

Dr. Stacey Lyle, associate professor of science and engineering, is the team leader for the UAS component of the project. A professional surveyor who has worked with private industries, Lyle developed GPS and aerial photogrammetry products and the ASCOT aerial survey control tool, a GPS-based management system for aerial survey flights.

“The UAS initiative directly benefits the University’s academic programs and increases the College of Science and Engineering’s competitiveness for externally-funded research,” says Lyle. “In addition, this capability will enable Texas A&M-Corpus Christi to become a leader in UAS technology training and education at both the state and national levels.”

The UAS flights, which are approved for both day and night campaigns, will be made using RS-16 unmanned Tier II systems with 13-foot wingspans that are capable of staying aloft for 12-16 hours. Their data collection capabilities include video, mapping, communications relay, and advanced video telemetry. The aircraft will be provided by American Aerospace Advisors Incorporated, a UAS operator and leader in developing processes for the use of unmanned aircraft.

Dr. Dugan Um, an assistant professor of mechanical engineering, is team leader on the ROV component of the project. Over the past several years, Um has conducted several national and international research projects including the National Science Foundation supported Research Experience for Undergraduate Students and Teachers project; and the Korea Institute of Science and Technology supported Frontier project.

To conduct the underwater research, the College of Science and Engineering has acquired a VideoRay P4 ROV with a depth rating of 1,000 feet and a maximum speed of 4.2 knots, or 4.8 miles per hour. Using this type of vehicle, scientists around the world have documented both endangered and invasive fish species, identified polluted habitats, and discovered new fish species.

“The ROV can be used in both onshore and offshore environments for surveying, inspection, and surveillance that is important to the oil and gas industry, offshore wind farms, fish farms and can even be employed to find and explore sunken ships,” points out Um. “Faculty, staff and students are learning the ROV operation, working to augment the sensing capabilities and developing algorithms to track motion of marine species.”

According to Chen, the USI capabilities will make it easier and safer to gather data on the complex systems within the world’s ninth-largest body of water. In addition, the UAS and ROV technology will advance the scientific and engineering base that supports the economic and ecological health of the Gulf of Mexico and provides new research and teaching opportunities for students and faculty.

“The Unmanned Systems Initiative is an example of our commitments to support sustainable growth of the coastal communities, to enlarge the research enterprise, and to enhance the students’ learning experience,” stresses Chen. “These capabilities directly benefit our research endeavors by providing students, faculty, and staff with excellent opportunities to pursue interdisciplinary research in the Gulf Coast region.”
The Price of Oil

GULF OF MEXICO SUMMIT WILL ADDRESS DAMAGE FROM DEEPWATER HORIZON SPILL

The Harte Research Institute for Gulf of Mexico Studies (HRI) will bring together elected officials, environmental experts, and industry and business leaders from the Gulf states at the second “State of the Gulf of Mexico” summit from Sunday, Dec. 4, through Thursday, Dec. 8, in Houston, Texas.

Around 400 representatives from universities; state and federal agencies; private businesses; and nongovernmental organizations from the United States, Mexico, and Cuba will address damage to the world’s ninth-largest body of water caused by the explosion of the Deepwater Horizon oil platform on April 20, 2010. According to HRI Director Larry McKinney, the goal is to define what a healthy gulf should be, chart a course to that end, and prescribe the means to assess progress to that goal.

“There remains significant debate in the scientific community about the ecological effects of the spill and even about the fate of the oil itself,” says McKinney. “How the spill will ultimately impact the open ocean, deep bottoms and perhaps the shallow continental shelf portions of the Gulf ecosystem, we just do not know. Regardless of what we learn from this oil spill, we must move forward in assuring a healthy Gulf of Mexico for the future.”

Eleven workers were killed in the blowout of the platform located off the southeast coast of Louisiana. Before the spill was brought under control, an estimated 4.9 million gallons of oil escaped into the environment, threatening the entire ecosystem of the Northern Gulf of Mexico. McKinney and many other leading scientists believe that the effects of the spill will extend a significant distance from the site, affecting the unseen bottom communities of the Gulf.

“More than a year later, we are now in a position to put this massive insult to the Gulf into perspective,” says McKinney. “What was the damage? Has the Gulf recovered and if not, when will it recover?”

The summit will also evaluate the state of research efforts initiated during and after the spill and provide a basis to evaluate the ability to respond to future disasters, both man-made and natural. One of the tools employed will be BioGoMx, a Web portal on Gulf of Mexico research that represents a comprehensive biodiversity baseline prior to the oil spill. The information is based on the HRI’s Gulf of Mexico Biodiversity Project, a collaborative project involving 140 experts from 80 institutions in 15 countries that allows scientists to determine the impact of the oil spill and assess recovery of the affected species.

For more information on the 2011 “State of the Gulf of Mexico” Summit, go to http://www.sgmsummit.org/.

CONSERVATION GROUPS SUBMIT BLUEPRINT FOR GULF RESTORATION

The Harte Research Institute (HRI) has joined with six other national conservation groups to submit a blueprint for restoration of the natural systems of the Gulf of Mexico in the wake of the devastation caused by last year’s Deepwater Horizon disaster.

The plan submitted to the Presidential Task Force on Gulf Coast Ecosystem Restoration includes recommendations made by the HRI, Nature Conservancy, National Audubon Society, Ocean Conservancy, National Wildlife Federation, Environmental Defense Fund, and the Lake Pontchartrain Basin Foundation. On Aug. 1, the groups delivered their recommendations titled a “Strategy for Restoring the Gulf of Mexico” to the task force to develop a comprehensive plan to effectively address the Gulf’s longstanding ecological decline and the damage caused by the worst marine oil spill in history.

The groups’ recommendations were released in advance of a vote by the Senate Environment and Public Works Committee on legislation that would provide funding to implement the Presidential Task Force’s restoration plans. Under current law, most of the fines will be used for general government spending, rather than being directed toward the Gulf. The Senate bill, the RESTORE Gulf Coast States Act, would dedicate 80 percent of the oil spill fines to restoring the Gulf’s communities, economies, and environments.

“The Gulf is a national treasure and restoring it must be an urgent priority,” says Dr. Wes Tunnell, associate director of the HRI. “Too much time has already passed. We cannot miss this important opportunity to rebuild the Gulf and ensure it continues to support our nation’s economy, communities, and wildlife.”
An innovative project to recycle oyster shells back into the Gulf of Mexico waters is creating habitat where young oysters can attach and grow, ensuring an abundance of the mollusks for future commercial harvests.

Larval oysters are tiny, free-swimming plankton that depend upon the hard shells of previous generations for attachment and growth. In 2009, Dr. Jennifer Beseres Pollack, assistant professor in the Department of Life Sciences, developed the first oyster shell recycling program for the Texas Coastal Bend. Working with Water Street Restaurants and Niko’s Steakhouse, two local establishments that previously discarded tons of shucked oyster shells in area landfills, the program has already reclaimed more than 90,000 pounds of oyster shells and returned them to bay waters to maintain existing reefs and restore degraded habitats.

“Although more than 2.6 million pounds of oysters were harvested from Texas bays in 2008, no statewide mechanism exists for shucked shells to be returned to bay waters,” points out Pollack, who established the program in collaboration with the Harte Research Institute (HRI) and Port of Corpus Christi. “Instead, large quantities are simply thrown in the trash. This disposal of oyster shell in landfills disrupts the natural process of oyster reef growth and regeneration and deprives reefs of their most fundamental building blocks.”

Each week since the program began, University students have transported bins of oyster shells from the restaurants to a stockpile location at the Port, where they are dried in the sun and later reintroduced into the ecosystem. During the past year, recycled shells have been used to restore a 3.8 acre reef in Copano Bay, and plans are in development to build an educational oyster reef near Goose Island State Park that will be easily accessible to Corpus Christi Independent School District students for use in their aquatic science curriculum.

“Oyster reefs are one of the most threatened marine habitats on the planet,” says Pollack. “In addition to creating fish habitat, they filter and clean bay waters, and protect shorelines from erosion. There is a critical need to expand this oyster shell recycling program to provide new opportunities for marine resource conservation all along the Texas coast.”

As part of her master’s research, HRI Assistant Director Gail Sutton conducted an economic analysis to quantify the benefits of the oyster shell recycling initiative. This information will be shared with marine conservation groups and with other potential restaurant partners to encourage expansion of shell recycling efforts. “Oysters are an important ecological and economic resource and an important and valued component of the commercial fishing industry,” says Sutton. “We’ll take what we learn from this project and share it with key stakeholders to encourage them to take advantage of recycling.”

Corpus Christi businessman Brad Lomax, owner of Water Street Restaurants, has worked closely with the University on several previous projects and, in 2008, was named an Honorary Alumnus of the Island University. He is already convinced that the program is beneficial to the environment, both in the water and onshore.

“I am excited about this project,” says Lomax. “We will easily recycle 60 to70 tons annually, or about the equivalent of 20 Shamu-sized killer whales. Not only do the young oysters win, but the landfills do as well.”
DR. CHERIE MCCOLLOUGH, assistant professor of Science Education, was one of the first six educators inducted into The Texas A&M University System’s Chancellor’s Academy of Teacher Educators, on March 24. The Academy recognizes individuals who have made significant contributions to the field of teacher education and highlights the role of the A&M System in producing K-12 teachers for the state of Texas.

DR. BUNNY FORGIONE, associate dean in the College of Nursing and Health Sciences, has been appointed to the Healthy Texas Babies Expert Panel. The panel, which was developed by the Texas Department of State Health Services in partnership with the March of Dimes, is addressing the “Texas Healthy Babies Initiative” with activities and interventions based on current research; and the March of Dimes’ “Healthy Babies are Worth the Wait Initiative.”

DR. RUBY MEHRUBE OGLU, associate professor and former program coordinator for Mechanical Engineering and Engineering Technology in the College of Science and Engineering, was selected as a fellow for the 2011 Office of Naval Research Summer Faculty Research Program. The program allows faculty members to participate in research of mutual interest with professional researchers at U.S. Navy laboratories. The program also broadens the scope and horizon of faculty members’ research interests and provides a foundation for future research collaboration.

DR. COLBY STOEVER has been named director of the University’s Office of Planning and Institutional Research. Stoever, who previously worked on statewide higher education projects as a senior research specialist with the Texas Higher Education Coordinating Board, took over for Dr. Paul Orser who retired in August after 37 years at the University. Stoever earned a bachelor’s degree in psychology and communication from the University of Texas, and his master’s degree and doctorate in experimental psychology from the University of Texas-El Paso.

FLICKA RAHN, associate professor of music, received a Fulbright Specialist Grant to teach “American Art Song” courses in Spanish at the Universidad Autonoma de Queretaro in Mexico from May 6-22. The Fulbright Specialist Program promotes linkages between U.S. academics and professionals and their counterparts at overseas universities with education focused short-term collaborative projects in more than 100 countries worldwide.
UNIVERSITY REGISTRAR
MICHAEL RENDON has been elected president of the Texas Hispanic-Serving Institution Consortium, an organization dedicated to increasing the access, retention and success of students attending consortium member institutions. Rendon, who began serving his one-year term in January, was previously vice president of the consortium and is one of the leaders in establishing collaborations, and share resources such as facilities, equipment and personnel between member institutions.

DR. YOLANDA KEYS, associate professor in the College of Nursing and Health Sciences, was one of several area educators and professionals invited to take a ride with the “Blue Angels,” the U.S. Navy’s elite flight demonstration team, prior to the squadron’s exhibition at the NAS Corpus Christi Air Show in April. Each year, the Blue Angels take around 100 civilians for a ride aboard their F/A-18 Hornet fighter jets to emphasize career opportunities in the military.

DR. MAGESH THIYAGARAJAN, assistant professor of engineering and director of the Plasma Engineering Research Lab, has been elected as the University’s representative to the Texas Space Grant Consortium, a group of 47 universities, industrial organizations, non-profit organizations, and government agencies that work to ensure that the benefits of space research and technology are available to all Texans. The consortium is part of the National Space Grant Program which consists of 52 Space Grant Consortia nationwide.

DR. DULAL CHANDRA KAR, associate professor of computer sciences, was lead editor for “Network Security, Administration and Management: Advancing Technology and Practice,” released by IGI Global. The book is a collection of current research and practices in network security and administration that identifies the latest technological solutions, practices and principles on network security while exposing possible security threats and vulnerabilities of contemporary software, hardware and networked systems.

KATHRYN FUNK-BAXTER has been named executive vice president for Finance and Administration. Funk-Baxter, the University’s senior associate vice president for Finance and Administration since 2009, joined the University staff in 1994 as comptroller. In 1996, she was promoted to assistant vice president and comptroller, overseeing a department with more than 50 employees. In 2004, she was named interim vice president for Finance and Administration and served as associate vice president in that department for five years.

DR. JOANN CANALES, associate dean of Graduate Studies and professor in the College of Education, has been appointed to the board of Communities in Schools (CIS), the largest stay-in-school network in the nation. CIS is funded by the Texas legislature to help young people stay in school and prepare for life by coordinating the connection of community resources in school settings. Canales has more than 25 years experience working with school districts, regional, state, national and international organizations, and institutions of higher education.
The Times They Are a-Changin’

A NEW GENERATION OF STUDENTS, BUDGET CONSTRAINTS CHALLENGING PUBLIC EDUCATION

Shortly after taking over as provost last spring, Dr. Christopher Markwood made it a point to meet with each major department on campus to gain a clear understanding of the issues and opportunities facing Texas A&M University-Corpus Christi. He also had a message to deliver.

“It is an exciting but challenging time for faculty,” stresses Markwood. “Today’s students are unlike past students. This generation processes and utilizes information differently and faculty must be up to speed on students’ ways of learning.”

Markwood points out that technology has changed how people do business and interact. Students entering college today are among the first generation to grow up using computers, cell phones, video cameras, computer games, and other digital technology. That environment has caused a fundamental shift in the way students think and process information.

“We didn’t grow up with these things, but the fact is that pedagogy and technology now go hand-in-hand,” says Markwood. “Students now think, act, socialize, and learn differently.”

And student evolution is just one component of change facing universities. Spending cuts in funding for education have created a “new norm” in which institutions of higher learning must get by with fewer resources while facing increased accountability for those that are allocated. That demand for justification extends to the students and their families who are paying more for a college degree, and to donors who want to see their investment maximized.

“The burden for paying for a college education is increasingly falling to students and their families,” he points out. “This is a major investment for them and it is up to the University to develop and craft new degree offerings to meet future demands, especially in growing areas like engineering and marine science that take advantage of the University’s unique location.”

While Markwood’s focus is now on South Texas, his perspective is national. His educational and professional experience has taken him all across the United States, from the most northern points to most southern regions, with several stops in America’s heartland. Markwood earned his bachelor’s degrees in political science and history from Southwest Baptist University in Bolivar, Mo., and earned his master’s degree and Ph.D. in political science from the University of Missouri-Columbia.

During his career, he has held teaching positions at Lamar University, the University of Missouri-Columbia, Columbia College and Southwest Baptist University. At the University of Central Oklahoma, he started as an assistant professor in the Department of Political Science and moved upward through the faculty ranks, becoming the inaugural dean of the College of Arts, Media and Design in 2001. Prior to joining Texas A&M-Corpus Christi, Markwood spent five years at the University of Wisconsin-Superior where he served as provost and interim chancellor.

“We’re not alone here at Texas A&M-Corpus Christi,” adds Markwood. “All across the country, public institutions of higher learning are being asked to do more with less contribution from the states. We as a campus community must rethink a number of policies, practices, and priorities in the face of these limitations. But our highest priority must still be to provide students with the skill sets they need to meet the challenges of a 21st century, knowledge-based economy.”

Inspiring “once in a lifetime” performances... on the field and in the classroom.

Your support enables more than 200 athletes to excel in the classroom and on the courts, in the fields and over the fairways. Becoming a member of the Islander Athletic Fund is the ideal way to benefit from your support of Islander Intercollegiate Athletics. FEATURes
Wind Turbines Supply Renewable Energy that Lower Utility Costs

Eleven vertical wind turbines that are being installed at three Texas A&M University-Corpus Christi locations will increase the University’s ability to take advantage of renewable energy, saving an estimated $37,000 to $52,000 a year in utility costs.

The turbines provided by Urban Green Energy are being placed on the main campus, the Coastal Bend Business Innovation Center in Flour Bluff, and the Momentum Campus at the intersection of Ennis Joslin Road and Nile Drive. The turbines will allow the University to increase the renewable energy in the Corpus Christi area; provide energy savings for the sites selected; reduce the carbon footprint; and engage in active institutional learning from the project. The power from the turbines, which will produce an estimated 217,945 kilowatt hours of electricity each year, is considered renewable energy because it comes from a non-diminishing supply at no additional cost.

The initiative was made possible by a $955,000 Renewable Energy Technology Stimulus Grant from the Texas Comptroller of Public Accounts. The University will provide $265,000 matching funds for a total of $1.2 million.

IT STARTS WITH A GIFT...

Universities throughout our nation are continually becoming more dependent upon the generosity of private donors to provide the essential dollars required to reach new levels of excellence. It is the nature of an institution growing stronger to require support beyond what can be procured through appropriations and tuition.

Just as Texas A&M University-Corpus Christi is committed to the well-being of its greater community, many businesses and professionals see the University as an investment toward the growth of a quality, global-minded workforce.

The Achieve Partnership program provides the opportunity for many to support students first-hand through scholarships which help defray the costs of tuition and fees.

The Achieve Partnership program offers an excellent venue for supporting our youth who aspire to become leaders within many industries during their careers. Please consider how your gift today can develop the future of a student who one day may improve the quality of your life.
IN ONE OF THE WORST ECONOMIC DOWNTURNS THIS COUNTRY HAS EVER SUFFERED, OUR MOMENTUM CAPITAL CAMPAIGN NOT ONLY MET THE GOAL, IT EXCEEDED IT.

President Flavius Killebrew
Trent Hill will never forget the day he met Lawrence Atkins.

As vice president for Institutional Advancement, Dr. Hill keeps a full schedule. But on that day in 1998, when his secretary informed him that a salesman had dropped by unannounced, Hill decided to see him.

Drawing on his experiences as a banker earlier in his career, Hill took time to chat with Atkins and learned that after serving in the Pacific theatre in World War II then trying his hand at a couple of jobs in civilian life, in 1968 the Alice, Texas, native had started his own specialty business among other endeavors. It was a one-man operation at the start, with Atkins driving across South Texas in a car loaded with office supplies, stopping at promising businesses along the way.

During the course of their talk, Hill answered Atkins’ questions about Texas A&M University-Corpus Christi, telling him that with all its potential for growth, the University’s biggest challenge in competing with the state’s top schools for highly-qualified students was finding the money to provide scholarships to students whose families could not afford to send them to college.

Before Atkins left, Hill placed an order for some office supplies and the two parted amicably. Atkins had just made a sale and, although he didn’t know it at the time, Hill had just made one of the best investments of his career.

“We never became what you would call fast friends, but over the years he would call occasionally and we’d talk about what was going on at the University,” remembers Hill. “Then one day in 2006, I got a call from his attorney informing me that Mr. Atkins had passed away and that the University was in his will.”

Atkins, it turned out, had done well over the years. Atkins Advertising and Associates was successful, he had purchased a ranch in Orange Grove, Texas, where he raised Beefmaster cattle while overseeing his advertising company and several oil interests. In his will, Atkins had bequeathed more than $5 million to Texas A&M-Corpus Christi, the largest single private gift given toward scholarships in the school’s history.

“I’ve learned from my banking career that you can’t judge a book by its cover,” says Hill. “I treat all people like potential donors, one because it’s the right thing to do. And two, because you never know. It turned out that Mr. Atkins wasn’t interested in buying real estate. He believed in investing in the potential of students.”

When Larry and Karen Urban were asked to serve as chairs of the University’s $25 million Momentum Campaign, they brought that same type of enthusiasm to the task. They challenged the campaign committee to exceed its goal and led the way in calling upon individuals, organizations, and businesses throughout the area spreading the message that “now is the time to act.” The future of the University is in the hands of the community.

“Over the years, we had watched as the campus grew in its student body, academic programs, and buildings, and that made us very proud,” says Larry Urban. “The University has woven itself into the fabric of the greater community, creating an economic boost,

</table>
and raising cultural awareness and educational strength. Now, with the University moving away from reliance on state appropriations, it is more important than ever that we continue to foster the growth of the University, in both academic success and national stature.

Not only was the Momentum Campaign successful during a time of national economic insecurity, it far surpassed expectations. During the final “State of the University” luncheon in September, President Flavius Killebrew announced that the final total for the campaign had topped the additional $5 million challenge goal with a grand total of $37,255,547.74 million being raised, the majority to support student scholarships. “In one of the worst economic downturns this country has ever suffered, our Momentum Capital Campaign not only met the goal, it exceeded it,” Killebrew says. “That is the kind of passionate support from the community that has helped the University thrive in the past and, in the future, will continue to allow us to provide students with a high-quality, affordable education that will help them achieve their career and personal goals.”

Still, there is the reality of the $17.4 million in state revenues that the Texas Legislature cut from Texas A&M-Corpus Christi’s budget over the next two years and the concerns about more cuts looming in the future. With that in mind, Texas A&M-Corpus Christi is working proactively and, in November, will host a Higher Education Summit with State Rep. Todd Hunter that will bring the business community, parents, students, and educators to campus to discuss and find solutions to the issues facing higher education, especially in South Texas where education cuts were 19 percent, 10 percent higher than the rest of the state.

“South Texas is just beginning to redress many decades of educational neglect,” points out Killebrew. “We survived the cuts this year with careful planning, but our momentum is in danger of grinding to a halt if we receive another round of similar cuts next biennium. We’ve gotten to where we are today because 20 years ago people spoke up and said ‘the time has come for South Texas.’ The future of the Island University and the economic and cultural growth of the Coastal Bend community depend on that same spirit of self-reliance and dedication to higher education.”

Lena Coleman-Wilson has always believed in “pay it forward.” “My Mother taught me that you can do anything you set your mind to,” Coleman-Wilson says. “All you need to do is trust in God and treat people right. And remember, blessings are received to be passed on.”

Throughout her life, Coleman-Wilson has followed that credo. The latest example of her commitment is the initial $200,000 gift she presented to the Island University in May to establish the Lena Coleman-Wilson Hope Scholarship for deserving students who are pursuing a degree from Texas A&M University-Corpus Christi. To be eligible, students must meet admission requirements. However, the awarding is also based on potential. “We created the Hope Scholarship to help students who don’t have the highest GPA but do have the ability and drive to improve academically,” says Coleman-Wilson. “There are so many exceptionally bright students applying for scholarships that something needed to be done to help qualified students who aren’t getting the top scholarships but who need financial help to get their foot in the door.”

The Hope Scholarship is just Coleman-Wilson’s most recent gift to the University. In 1996, she created the non-profit LC Foundation and set aside a percentage of the money for scholarships for Coastal Bend high school graduates to attend Texas A&M-Corpus Christi. In August 2010, she presented University President Flavius Killebrew with $100,000 to help fund student scholarships, faculty enrichment, and activities and programs which build on community engagement. And she believes that the Momentum Campaign launched by Dr. Killebrew will allow more talented, bright students to attend the University.

“I advise young people to attend Texas A&M-Corpus Christi because of the excellent education it provides,” says Coleman-Wilson. “I have seen the results. When young people graduate, they are equipped with the tools for a successful career.”
The Michael and Karen O'Connor Building, home to the College of Business, opened with a ceremonial ‘ringing of the bell’ on May 13.

The John Buckley Conference Room is named in memory of the College of Business graduate who, until his death in 2008, was head of the accounting firm of Buckley and Associates. In 2007, Buckley was the recipient of the G. Russell Kirkland Distinguished Visitor in Business Administration award. In 2006, he received the University's Outstanding Alumni Award.

The Melvin Klein Conference Room honors the Corpus Christi entrepreneur, who has served on the President’s Council, received an Honorary Doctorate of Humane Letters, and established a scholarship for Writing and Communication. In 2006, Klein, who also served as an adjunct in the College of Business, received the G. Russell Kirkland Distinguished Visitor in Business Administration award.

The Dr. Robert R. Furgason Conference Room recognizes the achievements of the former University president who, during his 14-year tenure from 1990 to 2004 engineered the University’s transition from an independent upper-level university to a four-year institution. From 2005 to 2007, Furgason served as the first executive director of the Harte Research Institute for Gulf of Mexico Studies.
University Establishes Distinguished Speaker Series

The Texas A&M University-Corpus Christi Distinguished Speaker Series will feature nationally and internationally-prominent experts who have changed the world and influenced the lives of millions of people. All proceeds from the annual event will support scholarships for students at the Island University.

The University is honored to inaugurate the series on Veterans Day, Friday, Nov. 11, by presenting former Secretary of State Robert Gates, the only person to have served two presidents in that position. Gates will share his candid insights on global politics and world affairs, U.S. intelligence and defense strategies, leadership, and the global challenges of the 21st century.

Dr. Gates is considered "The Soldier’s Secretary" for making the well-being of the men and women in uniform his top priority. He is a three-time recipient of the Distinguished Intelligence Medal, the CIA’s highest award, and is the only career officer in the CIA’s history to rise from entry-level employee to director. He has earned the National Security Medal, the Presidential Citizens Medal, and the National Intelligence Distinguished Service Medal.

Alumni Beat the Heat at Summer Mixer

Caitlin Johnson (from left), Jonas Chupe and Kimberly McNierney pose for a photo at the ‘Summer Taste of Texas’ mixer held Aug. 4.

The Corpus Christi Area Alumni Club of Texas A&M University-Corpus Christi held its annual “Summer Taste of Texas” mixer on Aug. 4 at the K-Space Contemporary in downtown Corpus Christi. The event, which was attended by more than 100 guests including University President Flavius Killebrew and Islander men’s basketball coach Willis Wilson, included a wine tasting, hors d’oeuvres, music by DJ Johnny Hotcakes, and a silent auction.
The Islander ROTC Battalion held a combat training exercise on the Momentum Campus during the spring semester with the objective of capturing a cache of weapons and disabling an anti-aircraft gun site defended by local military veterans and volunteers. Around 40 ROTC cadets using airsoft rifles that fire plastic pellets took part in the mock attack which was designed to expose cadets to detailed planning, training and execution of an assault.

University Once Again Ranked Among ‘Top Military Friendly Schools’

For the third consecutive year, Texas A&M University-Corpus has been designated as a “Military Friendly School” by G.I. Jobs magazine. Colleges, universities, and trade schools named as “Military Friendly” must rank in the top 20 percent nationwide for efforts and results in recruiting and retaining military and veteran students to increase diversity among the student body, faculty, and staff.

For this year’s rankings, G.I. Jobs, the leading magazine for military personnel transitioning into civilian life, incorporated a survey of student veterans. The feedback was gathered and studied to help provide prospective military students with insight into the student veteran experience at a particular institution based on peer reviews from current students.

To assist the more than 700 veterans and their dependents attending the Island University, Texas A&M-Corpus Christi has adopted the Military Student Bill of Rights and is participating in the Servicemembers Opportunity Colleges, a consortium dedicated to helping service members and their families obtain college degrees. In addition, the University’s Department of Veterans Affairs assists the newest generation of veterans with applying for educational benefits granted by the Post 9/11 GI Bill. For more information, go to http://vets.tamucc.edu/.

eLine Military Program

- ELine Military Nursing Program
  Awards College Credit Based on Experience

The eLine Military program (ELM) being offered by the College of Nursing and Health Sciences allows Texas residents who are serving in the military or who are veterans to receive college credit based on medical experience in the field.

Available entirely online, the program gives participants access to distance learning technologies to earn a bachelor’s of nursing degree, be eligible to take the NCLEX, become a registered nurse and enter the health care workforce. The ELM program is modular, articulated, and competency based, allowing military personnel to seamlessly process through the program without repeating prior content.

The ELM program will increase access to quality health care in Texas by developing a qualified, culturally competent health workforce. The nursing ELM will employ a program coordinator who will provide the key support, guidance, and expertise to students so that they may access other mainstream resources.

Veterans Information Fair

Former members of the U.S. military received information on educational benefits and state and federal programs available to those who have served their country at the University’s second Veterans Information Fair held in August.

Representatives from the University’s Financial Aid, Admissions and Veterans Affairs offices answered questions for prospective and current students and provided information about the “Post 9/11 Veterans Education Assistance Act of 2008” and many other benefits including the “Texas Hazlewood Legacy Program,” which allows veterans to transfer some of their educational benefits to their children. In addition, a representative from the Texas Veterans Land Board offered information on low-term housing, land and home improvement loans, and military recruiters were on hand with information about opportunities in all five branches of the U.S. armed forces.

For the last two years, Texas A&M-Corpus Christi has been designated as a “Military Friendly School” by G.I. Jobs magazine for its efforts and results in recruiting and retaining military and veteran students. As of spring 2011, more than 700 veteran students or their family members attending the University were receiving benefits from the Veterans Administration and the Texas Hazlewood Act.

Ed Rachal Foundation Scholarships

The Islander Battalion has received a $100,000 grant from the Ed Rachal Foundation to award merit-based scholarships to ROTC students. The two-year grant, which provides funds based on a combination of academic and physical training performance, will help undergraduate ROTC students with tuition and fees, or room and board expenses not covered by financial aid. In 2010, the foundation provided $60,000 to the Islander Battalion for construction of the ROTC Field Leadership Reaction Course on the University’s Momentum Campus.
**Features**

**It’s All Here at Texas A&M University-Corpus Christi!**

Whether the Island University is sponsoring educational events for area students or presenting our visitors with art exhibits, cultural programs, theatrical productions, and music concerts, the community has numerous opportunities to experience everything the Island University has to offer.

*There’s something for everyone!* 

---

**Oceanophony**

Nearly 1,200 area elementary students were treated to a performance of Bruce Adolphe’s “Oceanophony” in the Performing Arts Center on May 17. The educational piece, which combined music, poetry, narration and a slide presentation to teach children about ocean creatures, included a chamber orchestra consisting of faculty and top University music students.

---

**Islander Lights**

Children of all ages rang in the holidays during the “Islander Lights” celebration Dec. 3 at the Performing Arts Center plaza. The evening featured a visit from Santa Claus, traditional holiday music, games, and family activities. The highlight of the festivities was the illumination of campus buildings along Ocean Drive in Islanders’ blue and green lights.

---

**Paws for a Cause**

Dogs and their owners took a stroll down the University’s hike-and-bike trail to fight breast cancer during the “Paws for a Cause” dog walk in October. Proceeds from the Breast Cancer Awareness Month event benefit First Friday; a non-profit program that underwrites free mammograms for South Texas women.

---

**Hispanic Heritage Month**

A kick-off party in Hector P. Garcia Plaza included live music, ballet folklórico performances, and salsa dance lessons. Students got involved with an Immigration panel discussion, a film screening of “The Longoria Affair,” and a Read-A-Thon of Hispanic authors as part of the month long celebration of Hispanic Heritage Month on campus.

---

**Art Exhibit**

The community is always invited to view the University’s many art exhibits throughout the year. In April, an opening reception for the “Herencia Chicana” (Chicano Heritage) exhibition by graduate students Grace Barraza-Vega and Sandra Gonzalez in the Master of Arts Painting Program was held at the Islander Art Gallery.

---

**Upcoming Events**

- Nov. 3-5: University Theatre: Bailando Dance Festival Workshops. 361.825.5800.
- Nov. 11: Texas A&M University-Corpus Christi Distinguished Lecture Series featuring Dr. Robert Gates. 361.825.2787.
- Nov. 29: University Theatre: Islander Dance Demo. 361.825.5800.
- Dec. 1-17: University Galleries: Annual Gallery Fundraiser. 100 pieces of art at $100 or less. 361.825.3756.
Float-a-Boat
Groups of students in the GATE Summer Education Program attempted to sail a teammate across a swimming pool in boats constructed from cardboard and duct tape during the “Float-a-Boat” contest at the Moody Sustainers Field House. The team-building exercise challenged the ingenuity of high school students from across Texas who are interested in teaching mathematics and/or science at the elementary or secondary levels.

Battle of the Bands
Music lovers flocked to campus for the Battle of the Bands XII held last December. Ten local groups were judged on technical skill, creativity, stage presence, vocal skill and audience reaction with the winner taking the title of “Top Rockers on Campus.”

Alice in Wonderland
The timeless children’s fantasy “Alice in Wonderland” with its far-out cast of talking animals, wicked knights and queens, and other characters came to life on the Performing Arts Center stage Aug. 4-6. Every year, the University Theatre presents a broad-range of musicals, comedies, and dramas for the entertainment of the Coastal Bend community.

GIS Technology is Changing Our World
More than 600 students took part in “GIS Technology is Changing our World,” a Geography Awareness Week event at the Conrad Blucher Institute for Surveying and Science. Participants watched demonstrations of GIS, Global Positioning System and Remote Sensing-Satellite technology, and received hand-on instruction from GIS professionals and experts.

Teaching Future Teachers
Dr. Denise Hill schools students on use of integrated technology, manipulatives in classroom

For Dr. Denise Hill, few things are more satisfying than watching the transformation of pre-service teachers into educators who are equipped with the skills to prepare youngsters for a challenging future.

Hill, associate professor and chair of Teacher Education, stresses the utilization of integrated technology and hands-on manipulative instruction in the classroom. By linking mathematics and science, she says, teachers are able to integrate experiments and activities that provide students with real-world examples of the importance of both skills. Her greatest challenge is to ensure that today’s teachers refrain from the same methods that were the norm decades ago.

“Lecturing and memorization are not ways to reach students who have technology at their fingertips,” says Hill. “If we’re not integrating multiple media, we’re going to lose them. It is my responsibility to show college students that they need to incorporate many tools every time they teach.”

For instance, she says, teachers can use manipulatives such as matchbox cars, rulers, and books stacked at varying heights to explain Newton’s Laws of Motion. Not only do they learn about science forces and motion, using ratios and proportions and linear graphs created with the data collected, they can predict how far the car will travel after being released from different heights or on different types of surfaces.

“Mathematics is the language of science, and science enriches real-world mathematics problem-solving and fosters the fun of learning,” points out Hill. “Communication is crucial to the success of each student, and the efficient use of technology allows the communication pathways to be immediate, timely, and effective. Social networking systems such as Wiki pages and blogs can be utilized to support communication between students, teachers, and parents.”

Hill speaks from experience. Before earning her Doctorate in Educational Leadership from Texas A&M University-Corpus Christi in 2002, she spent 19 years in Texas public schools where she taught math and science integrated curriculums to gifted and talented, and struggling students. In 2001, she was named the Corpus Christi ISD Teacher of the Year. The following year she joined the faculty at her alma mater where she passes on her knowledge to the next generation of educators.

Robyn Hernandez, who teaches third grade at Schanen Estates Elementary School in the Corpus Christi ISD, was a pre-service teacher under Hill. Hernandez, who earned a master’s degree in 2010, says she has not forgotten what Hill taught her about utilizing hands-on lessons in the classroom.

“I learned about using discovery scopes, binoculars, rain gauges, compasses, and thermometers and even games like bingo and Jeopardy to get my students more engaged in their lessons,” says Hernandez. “The children get excited about what they’re learning. They participate more and retain more information because the lessons have real meaning for them.”

Hill’s commitment to excellence has not gone unnoticed. In 2009, she was the recipient of the University’s Faculty Teaching Excellence Award and, last year, she received the Faculty Service Excellence Award. She currently serves on the board of directors for the Science Teachers Association of Texas, the state affiliate of the National Science Teachers Association. As a site professor who develops, implements, and evaluates coursework at several schools including the University’s Early Childhood Development Center, Hill encourages clinical teachers to assume multiple roles in the classroom.

“Over the course of a year, I see pre-service teachers develop a passion for reaching their students and ultimately come to realize that they are the ones responsible for impacting their students’ lives,” she says.
COLLEGE OF BUSINESS

Bruce Amldr ’99 BBA Business Administration retired from Goodyear in March 2010 after 40 years of service and moved from Ohio to Las Vegas, Nev., to get away from the cold and snow. He has been married for 38 years and has two children; a boy and a girl.

COLLEGE OF NURSING AND HEALTH SCIENCES

Mary A. Heimanman '88 BSN ’95, MSN is in her 36th year of nursing and has enjoyed every bit of it. She has had the privilege of working with some of the best and most dedicated nurses. She feels that many people don’t realize how many lives nurses have touched over the years.

Ronald G. Dewees '99 BSN Nursing returned to Japan from a nine-month deployment at a trauma center in Afghanistan, Afghanistan, where he served as team leader in the Trauma Intensive Care Unit. His unit was recognized for having the highest survivability rating of any U.S. military facility within the country and around the world.
Shelley A. Dinkens '02 MSN Nursing Administration is a full-time faculty member in the College of Nursing and Health Sciences at Texas A&M-University-Corpus Christi. While raising her two children, she earned her Master’s Degree in Nursing Administration and worked as a school nurse in the Corpus Christi ISD.

Wanda Pruett '07 MSN Nursing is a home-based full-time clinical trial manager for a mid-size contract research organization. She manages global clinical research trials in the oncology therapeutic area.

Carmelita Bush-Turner '07 BSN Nursing moved back to Salinas, Calif., and is working part time at the methadone clinic in Salinas, Calif. She has 12 grandchildren, and just returned from a 14-day cruise in Alaska with her husband.

Patricia M. Branton-Lefeld '07 BSN Nursing married Matt Lefeld in September 2010. They live in Atlanta, Ga., where Matt works at Owens Corning Company. Patricia works at the Children’s Healthcare of Atlanta as a registered nurse on a neuroscience and plastics acute care unit.

Dinorah Martinez-Andresen '10 MSN Nursing Practitioner is a licensed family nurse practitioner and director of health services at Southwestern University in Georgetown, Texas.

Thomas Tran '10 BSN Nursing has been working in the nursing field for almost a year and is trying to join the military nursing corps to see the world. He misses his Corpus Christi friends, the beach, and fishing.

Damila C. Akinsipe '11 BSN Nursing is a registered nurse intern on the surgical unit at Ben Taub General Hospital for Harris County, Texas, Hospital District. She is applying to graduate programs, so she can earn her degree as a women’s health nurse practitioner and doctor of nursing practice.

Robert J. Doheny Jr. '11 BSN Nursing was commissioned an ensign in the United States Navy Nurse Corps upon graduating from Texas A&M-University-Corpus Christi. He will be transferring to the naval hospital in Pensacola, Fla., for his first assignment as a nurse.

Johnny M. Hasserodt '11 MSN Nursing Practitioner is a family nurse practitioner thanks to Texas A&M-University-Corpus Christi.

Etvette Gonzales Silvas '11 BSN is employed at Christus Spohn Hospital in Corpus Christi. She enjoys her new job and spent the summer with her 3-year-old daughter, Etvette.

Jordan Kelsi Mahan '11 MSN Nursing Practitioner is a family nurse practitioner in a multi-physician family practice clinic in Greenville, Texas.

Cindy S. Brister-Antley '11 MSN Nursing Practitioner earned her family nurse practitioner certification and works in the emergency department at Midland Memorial Hospital in Midland, Texas.

Patricia M. Adams '73 BS Mathematics moved from Brownsville, Texas, back to Corpus Christi in September 2011. Her son lives in Houston, Texas, and is a manager of an oil field sales company. Her grandson lives in Friendswood, Tenn., and has his own law firm, and her granddaughter is governor of the Mayflower Descents of Texas.

Richard Wheet '73 BA Chemistry is sailing the Caribbean and looking for the perfect piña colada.

Howard “Tony” Wood '79 BS Biology has returned to Corpus Christi after 31 years as an environmental and safety consultant throughout the world. He is now the director of the National Spill Control School at Texas A&M-University-Corpus Christi, mentoring Islanders with internships and helping them find employment opportunities.

William B. Schoolfield '90 BS Computer Science went to Scotland and visited Edinburgh, Blair Castle, Loch Ness, Inverness, Castle of Mey, the Isle of Skye, Loch Lomond, and Glasgow. He also went to Dublin, Ireland, and San Francisco, Calif.

Ronald R. Smith '96 MS Biology is a program specialist with the Texas Parks & Wildlife Department. He directs the anger recognition program, and works with public access to public water areas, creating paddling trails, and public outreach.

Marie A. Lammers '99 BS Environmental Science has worked as an inspector for the Ohio Environmental Protection Agency for 10 years. She has two children, Victoria, 7, and Dominic, 3.

Richard L. Shelton '90 BS Computer Science joined the Army and served as a medical officer for five years. He now works for Baylor College of Medicine at the Human Genome Sequencing Center as a software engineer. In his spare time, he writes Android applications and likes to work out and jog.

Scott C. Green '92 BS Computer Science joined the CT Networks to spearhead the ISO-20000 initiative for managed services, in December. He writes Android Genome Sequencing Center as a software engineer. In his spare time, he writes Android applications and likes to work out and jog.

Texas A&M University-Corpus Christi - 6500 Ocean Drive, Unit 5741
Corpus Christi, Texas 78412-5741 - (361) 825-2420

Lena D. Coleman, founder and CEO of The L C Foundation, Inc., recently established an endowment to help fund student scholarships, faculty enrichment, and activities and programs implemented through the president’s office.

Creating a scholarship endowment is one way to ensure your contribution will remain in perpetuity to support higher education and to help the University remain competitive in attracting the brightest students.

In recognition of donors making significant contributions to endowed scholarships, the University established the Endowed Scholarship Council. Donors with cumulative gifts to endowed scholarship funds of $50,000 or more are inducted into the Texas A&M University-Corpus Christi Endowed Scholarship Council and recognized at the annual Endowed Scholarship Banquet.

The LC Foundation, Inc. Endowed Scholarship

It’s Your Island University Calling!

Only the best and brightest students earn the opportunity to serve as Island Callers at Texas A&M University-Corpus Christi. While their time on the telephones is spent contacting hundreds of alumni and friends regarding the popular Islander Fund, each student is also your connection to latest happenings at the Island University. It’s more than a call for support, it’s your time to learn the greatness of your University and how you can invest in its growth. After all, you share the experiences of being an Islander.

Our Island Callers thank local businesses for their generous support, including: Applebee’s; Olive Garden; Water Street Seafood Co.; Church’s Chicken; Johnny Carino’s Italian; Hua Tai Hunan Gourmet; Mandarin Garden Chinese Restaurant; Denise’s Unlimited Salon; Snoopy’s Pier; and HEB Plus.
